Pfenninger, David Singleton, 2017-04-21 This book constitutes a holistic study of how and why late starters surpass early starters in comparable instructional settings Combining advanced quantitative methods with individual level qualitative data it examines the role of age of onset in the context of the Swiss multilingual educational system and focuses on performance at the beginning and end of secondary school thereby offering a long term view of the teenage experience of foreign language learning The study scrutinised factors that seem to prevent young starters from profiting from their extended learning period and investigated the mechanisms that enable late beginners to catch up with early beginners relatively quickly Taking account of contextual factors individual socio affective factors and instructional factors within a single longitudinal study the book makes a convincing case that age of onset is not only of minimal relevance for many aspects of instructed language acquisition but that in this context for a number of reasons a later onset can be beneficial Asia's Latent Nuclear Powers Mark Fitzpatrick, 2017-10-03 If the nuclear weapons club were to further expand would Americas democratic allies in Northeast Asia be among the next entrants Japan South Korea and Taiwan all have robust civilian nuclear energy programmes that make them virtual nuclear powers according to many analysts All three once pursued nuclear weapons and all face growing security threats from nuclear armed adversaries But will they or rather under what circumstances might they This book analyses these past nuclear pursuits and current proliferation drivers In explaining the nuclear technology that the three now possess it considers how long it would take each to build a nuclear weapon if such a fateful decision were made Although nuclear dominoes Northeast Asia cannot be ruled out the author does not predict such a scenario Unlike when each

previously went down a nuclear path democracy and a free press now prevail as barriers to building nukes in the basement
Reliance on US defence commitments is a better security alternative as long as such guarantees remain credible an issue
that is also assessed But extended deterrence is not a tight barrier to proliferation of sensitive nuclear technologies Nuclear
