Dislocating the Orient Daniel Foliard,2017-04-13 While the twentieth century s conflicting visions and exploitation of the Middle East are well documented the origins of the concept of the Middle East itself have been largely ignored With Dislocating the Orient Daniel Foliard tells the story of how the land was brought into being exploring how maps knowledge and blind ignorance all participated in the construction of this imagined region Foliard vividly illustrates how the British first defined the Middle East as a geopolitical and cartographic region in the nineteenth and early twentieth centuries through their imperial maps Until then the region had never been clearly distinguished from the East or the Orient In the course of their colonial activities however the British began to conceive of the Middle East as a separate and distinct part of the world with consequences that continue to be felt today As they reimagined boundaries the British produced disputed and finally dramatically transformed the geography of the area both culturally and physically over the course of their colonial era Using a wide variety of primary texts and historical maps to show how the idea of the Middle East came into being Dislocating the Orient will interest historians of the Middle East the British empire cultural geography and cartography **A University Education** David Willetts,2017-11-24 Universities have a crucial role in the modern world In England entrance to universities is by nation wide competition which means English universities have an exceptional influence on schools a striking theme of the book This important book first investigates the university as an institution and then tracks the

individual on their journey to and through university In *A University Education* David Willetts presents a compelling case for the ongoing importance of the university both as one of the great institutions of modern society and as a transformational experience for the individual The book also makes illuminating comparisons with higher education in other countries especially the US and Germany Drawing on his experience as UK Minister for Universities and Science from 2010 to 2014 the author offers a powerful account of the value of higher education and the case for more expansion He covers controversial issues in which he was involved from access for disadvantaged students to the introduction of 9 000 fees The final section addresses some of the big questions for the future such as the the relationship between universities and business especially in promoting innovation He argues that the two great contemporary trends of globalisation and technological innovation will both change the university significantly This is an authoritative account of English universities setting them for the first time in their new legal and regulatory framework *South African national bibliography* ,1999
