Mental Maps Janne Holmén, Norbert Götz, 2021-11-28 The concept of mental maps is used in several disciplines including geography psychology history linguistics economics anthropology political science and computer game design However until now there has been little communication between these disciplines and methodological schools involved in mental mapping *Mental Maps Geographical and Historical Perspectives* addresses this situation by bringing together scholars from some of the related fields Ute Schneider examines the development of German geographer Heinrich Schiffrers mental maps using his books on Africa from the 1930s to the 1970s Efrat Ben Ze'ev and Chlo Yvroux investigate conceptions of Israel and Palestine particularly the West Bank held by French and Israeli students By superimposing large numbers of sketch maps Clarisse Didelon Loiseau Sophie de Ruffray and Nicolas Lambert identify soft and hard macro regions on the mental maps of geography students across the world Janne Holmén investigates whether the Baltic and the Mediterranean Seas are seen as links or divisions between the countries that line their shores according to the mental maps of high school seniors Similarly Dario Musolino maps regional preferences of Italian entrepreneurs Finally Lars Erik Edlund offers an essayistic account of mental mapping based on memories of maps in his own family This edited volume book uses printed maps survey data and hand drawn maps as sources contributing to the study of human perception of space from the perspectives of different disciplines The chapters in this book were originally published as a special issue of the *Journal of Cultural Geography*

The Knowledge Gap Natalie Wexler, 2019-08-06 Essential reading for teachers education administrators and policymakers alike *STARRED Library Journal* The untold story of the root cause of America's education crisis It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country's frustrating lack of progress when it comes to providing every child with a quality education The problem wasn't one of the usual scapegoats lazy teachers shoddy facilities lack of accountability It was something no one was talking about the elementary school curriculum's intense focus on decontextualized reading comprehension skills at the expense of actual knowledge In the tradition of Dale Russakoff's *The Prize* and Dana Goldstein's *The Teacher Wars* Wexler brings together history research and compelling characters to pull back the curtain on this fundamental flaw in our education system one that fellow reformers journalists and policymakers have long overlooked and of which the general public including many parents remains unaware But *The Knowledge Gap* isn't just a story of what schools have gotten so wrong it also follows innovative educators who are in the process of shedding their deeply ingrained habits and describes the rewards that have come along students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed If we truly want to fix our education system and unlock the potential of our neediest children we have no choice but to pay attention
