William O'Donohue, Eric R. Levensky

Mcculloch Mac Cat User Manual:

Handbook of Forensic Psychology William O'Donohue, Eric R. Levensky, 2004-01-19 Forensic psychology has mushroomed into a diverse and increasingly complex field that is equal parts law and psychology. Psychologists act as expert witnesses in legal cases sometimes without knowing much about the laws involved and legal professionals rely on the assessment of psychologists sometimes without knowing much about how such assessments are made. The purpose of this handbook is to provide professionals with current practical and empirically based information to guide their work in forensic settings or to better their understanding of the issues and debates in forensic psychology. Divided into four sections, the Handbook of Forensic Psychology covers basic issues, assessment, mental disorders, and forensic psychology and special topics. The basic issue chapters present a primer on law for the psychologist, a primer on psychology for attorneys, an overview of ethical issues relevant to forensic psychology, and a chapter on forensic report writing. The assessment section discusses factors and measures relevant for assessing a variety of behaviors, propensities, and capabilities, including dangerousness, violence, suicide, competency, substance abuse, PTSD, and neuropsychological evaluations, as well as discussing interviewing children and child custody evaluations. Additional chapters discuss eyewitness testimony, recovered memory, polygraphs, sexual harassment, juror selection, and issues of ethnicity in forensic psychology.

Assessing Competence to Consent to Treatment Thomas Grisso, Paul S. Appelbaum, 1998 This is a concise guidebook to the assessment of patients' capacities to consent to treatment. It will help clinicians focus on the abilities that are relevant to legal definitions of competence to consent to medical and psychological treatment. With excellent case vignettes, the authors show how the interview process is carried out and offer strategies for responding to patients with limited capacities.

Psychological Evaluations for the Courts Gary B. Melton, John Petrila, Norman G. Poythress, Christopher Slobogin, Randy K. Otto, Douglas Mossman, Lois O. Condie, 2017-12-04 Tens of thousands of readers have relied on this leading text and practitioner reference, now revised and updated to understand the issues the legal system most commonly asks mental health professionals to address. The volume demystifies the forensic psychological assessment process and provides guidelines for participating effectively and ethically in legal proceedings. Presented are clinical and legal concepts and evidence-based assessment procedures pertaining to criminal and civil competencies, the insanity defense, and related doctrines, sentencing, civil commitment, personal injury claims, antidiscrimination laws, child custody, juvenile justice, and other justice-related areas. Case examples, exercises, and a glossary facilitate learning. 19 sample reports illustrate how to conduct and write up thorough, legally admissible evaluations. New to This Edition: Extensively revised to reflect important legal, empirical, and clinical developments; increased attention to medical and neuroscientific research; new protocols relevant to competence, risk assessment, child custody, and mental injury evaluations; updates on insanity, sentencing, civil commitment, the Americans with Disabilities Act, Social Security, juvenile and family law, and the admissibility of expert testimony; material on immigration law.
