

A. INPUT - Plug your guitar in here.

B. - Sensitivity/ gain switch for the input signal. When this button is in, it provides a 7dB cut useful for reducing distortion in the clean settings when using guitars with active electronics or humbucking pickups. The normal 'out' position is set for single coil pickups.

C. - This button activates the classic FENDER-CLEAN preset on your Automatic GT/SE amplifier.

D. - This button activates the STUDIO-CLEAN preset. When pressed, it adds a mild boost in the upper mid to high frequency range and provides slightly more overall gain than the Fender-Clean preset.

E. Automatic GT Automatic SE - This button activates the RHYTHM/CRUNCH preset. It rearranges the gain/tone structure to produce a semi-distorted tone useful for playing rhythm or bluesy leads. This preset has slightly more overall loudness than the clean presets.

F. Automatic GT Automatic SE - This button activates the RHYTHM/DRIVE preset. It further modifies the structure to provide more gain, loudness and a different tonal response than the rhythm/crunch preset.

Note: To create even more tonal possibilities, you can combine the various presets by simply pressing two or more preset buttons (items C through F) simultaneously.

G. FTSW - This LED illuminates when the LEAD/OVERDRIVE preset is activated, either by pressing the corresponding preset button (item H), or by using the CHANNEL SELECT function on the optional two-button footswitch (see item Q).

H. Automatic GT Automatic SE - This switch activates the LEAD/OVERDRIVE preset, which is useful for playing full-on leads and heavy power chords with lots of sustain. It has significantly more drive and sustain than any of the other presets. When this button is in, the previously selected clean or rhythm preset is disabled. This lead/overdrive sound can also be activated by the optional footswitch (see item Q).

I. VOLUME - Adjusts the overall loudness of the amplifier.

J. TREBLE - Adjusts the amount of boost or cut in the high frequency range for all presets.

K. BASS - Adjusts the amount of boost or cut in the low frequency range for all presets.
