Gentrification: A Working-Class Perspective Kirsteen Paton, 2016-04-22 Focusing on the working class experience of gentrification this book re examines the enduring relationship between class and the urban Class is so clearly articulated in the urban from the housing crisis to the London Riots to the evocation of housing estates as the emblem of Broken Britain Gentrification is often presented to a moral and market antidote to such urban ills deeply institutionalised as regeneration and targeted at areas which have suffered from disinvestment or are defined by lack Gentrification is no longer a peripheral neighbourhood process it is policy it is widespread it is everyday Yet comparative to this depth and breadth we know little about what it is like to live with gentrification at the everyday level Sociological studies have focused on lifestyles of the middle classes and the working class experience is either omitted or they are assumed to be victims Hitherto this is all that has been offered This book engages with these issues and reconnects class and the urban through an ethnographically detailed analysis of a neighbourhood undergoing gentrification which historicises class formation critiques policy processes and offers a new sociological insight into gentrification from the perspective of working class residents This ethnography of everyday working class neighbourhood life in the UK serves to challenge denigrated depictions which are used to justify the use of gentrification based restructuring By exploring the relationship between urban processes and working class communities via gentrification it reveals the hidden rewards as well as the hidden injuries of class in post industrial neighbourhoods In doing so it provides a comprehensive sociology of gentrification revealing not only how gentrification leads to the displacement of the working class in physical terms but how it is actively used within urban policy to culturally displace the working class subject and traditional

Gentrification Kirsteen Paton, 2018-02-12 Focusing on the working class experience of gentrification this book re examines the enduring relationship between class and the urban Class is so clearly articulated in the urban from the housing crisis to the London Riots to the evocation of housing estates as the emblem of Broken Britain Gentrification is often presented to a moral and market antidote to such urban ills deeply institutionalised as regeneration and targeted at areas which have suffered from disinvestment or are defined by lack Gentrification is no longer a peripheral neighbourhood process it is policy it is widespread it is everyday Yet comparative to this depth and breadth we know little about what it is like to live with gentrification at the everyday level Sociological studies have focused on lifestyles of the middle classes and the working class experience is either omitted or they are assumed to be victims Hitherto this is all that has been offered This book engages with these issues and reconnects class and the urban through an ethnographically detailed analysis of a neighbourhood undergoing gentrification which historicises class formation critiques policy processes and offers a new sociological insight into gentrification from the perspective of working class residents This ethnography of everyday working class neighbourhood life in the UK serves to challenge denigrated depictions which are used to justify the use of gentrification based restructuring By exploring the relationship between urban processes and

working class communities via gentrification it reveals the hidden rewards as well as the hidden injuries of class in post industrial neighbourhoods In doing so it provides a comprehensive sociology of gentrification revealing not only how gentrification leads to the displacement of the working class in physical terms but how it is actively used within urban policy to culturally displace the working class subject and traditional Gentrification, 2014 Focusing on the working class experience of gentrification this book re examines the enduring relationship between class and the urban Class is so clearly articulated in the urban from the housing crisis to the London Riots to the evocation of housing estates as the emblem of Broken Britain Gentrification is often presented to a moral and market antidote to such urban ills deeply institutionalised as regeneration and targeted at areas which have suffered from disinvestment or are defined by lack Gentrification is no longer a peripheral neighbourhood process it is policy it is widespread it is everyday Yet comparative to this depth and breadth we know little about what it is like to live with gentrification at the everyday level Sociological studies have focused on lifestyles of the middle classes and the working class experience is either omitted or they are assumed to be victims Hitherto this is all that has been offered **Gentrification** Kirsteen Paton, 2014-10-01 This book reconnects class and the urban through an ethnographically detailed analysis of a neighbourhood undergoing gentrification which historicises class formation critiques policy processes and offers a new sociological insight into gentrification from the perspective of working class residents This ethnography of everyday working class neighbourhood life in the UK serves to challenge denigrated depictions which are used to justify the use of gentrification based restructuring By exploring the relationship between urban processes and working class communities via gentrification it reveals the hidden rewards as well as the hidden injuries of class in post industrial neighbourhoods **The Palgrave Handbook of Urban Ethnography** Italo Pardo, Giuliana B. Prato, 2017-11-14 These ethnographically based studies of diverse urban experiences across the world present cutting edge research and stimulate an empirically grounded theoretical reconceptualization The essays identify ethnography as a powerful tool for making sense of life in our rapidly changing complex cities They stress the point that while there is no need to fetishize fieldwork or to view it as an end in itself its unique value cannot be overstated These active engaged researchers have produced essays that avoid abstractions and generalities while engaging with the analytical complexities of ethnographic evidence Together they prove the great value of knowledge produced by long term fieldwork to mainstream academic debates and more broadly to society Research Handbook on Urban Sociology Miguel A. Martínez, 2024-04-12 Emphasising the social critical and situated dimensions of the urban this comprehensive Research Handbook presents a unique collection of theoretical and empirical perspectives on urban sociology Bringing together expert contributors from across the world it provides a rich overview and research agenda for contemporary urban sociological scholarship **Walking** Charlotte Bates, Emma Jackson, 2026-03-17 Going for a walk with twenty sociologists this collection is a playful rendition of the social worlds that we move in and through From city streets to coastlines along riverbanks and through

street markets alone and together each walk blurs descriptive poetic and theoretical observations and insights to reveal the worlds we live in afresh Attending to the politics and poetics of walking and place the collection challenges the taken for granted privileges of mobility highlights the ways in which walking is embodied and situated and shows how social life unfolds in and through spaces Learning on and from the streets tracing footprints and attending to rhythms these walks map sociological thought and carve new paths in the terrain of the sociological imagination

Class in the New Millennium Will Atkinson, 2017-02-17 Class in the New Millennium paints a fresh and comprehensive picture of social class in Britain today Anchored in a broad repertoire of methods and pursuing a distinctive theoretical agenda it not only painstakingly maps the structure transformation and effects of the UK's key fault lines but goes behind closed doors to see how they play out in everyday family life Throughout the book Atkinson throws new light on a diverse array of themes including the continued effects of deindustrialisation educational expansion feminisation of the workforce and surging employment insecurity the persistence of lifestyle cleavages despite cultural and technological change the growth of political disengagement the transformation of the Labour Party and the rise of nationalism the entwinement of class with space place and physical movement and the way in which class interacts with intimate relations to shape not just the way we decorate our walls or talk over the dining table but the very reproduction of the class structure itself This innovative title will appeal to scholars as well as advanced undergraduate and postgraduate students interested in the fields of sociology politics and political science cultural studies cultural geography social policy and social work

Rent and its Discontents Neil Gray, 2018-09-16 The 1915 Rent Strikes in Glasgow along with similar campaigns across the UK catalysed rent restrictions and eventually public housing as a right with a legacy of progressive improvement in UK housing through the central decades of the 20th century With the decimation of social housing and the resurgence of a profoundly exploitative private housing market the contemporary political economy of housing now shares many distressing features with the situation one hundred years ago Starting with a re appraisal of the Rent Strikes this book asks what housing campaigners can learn today from a proven organisational victory for the working class A series of investigative accounts from scholar activists and housing campaign groups across the UK charts the diverse aims tactics and strategies of current urban resistance seeking to make a vital contribution to the contemporary housing question in a time of crisis

Globalism and Localization Jeanine Canty, 2019-05-16 Considering the context of the present ecological and social crisis this book takes an interdisciplinary approach to explore the relationship between globalism and localization Globalism may be viewed as a positive emergent property of globalization The latter depicts a worldwide economic and political system and arguably a worldview that has directly increased planetary levels of injustice poverty militarism violence and ecological destruction In contrast globalism represents interconnected systems of exchange and resourcefulness through increased communications across innumerable global diversities In an economic cultural and political framework localization centers on small scale communities placed

within the immediate bioregion providing intimacy between the means of production and consumption as well as long term security and resilience There is an increasing movement towards localization in order to counteract the destruction wreaked by globalization yet our world is deeply and integrally immersed within a globalized reality Within this collection contributors expound upon the connection between local and global phenomenon within their respective fields including social ecology climate justice ecopsychology big history peace ecology social justice community resilience indigenous rights permaculture food justice liberatory politics and both transformative and transpersonal studies

Housing Displacement Guy Baeten, Carina Listerborn, Maria Persdotter, Emil Pull, 2020-10-14 This book examines reasons processes and consequences of housing displacement in different geographical contexts It explores displacement as a prime act of housing injustice a central issue in urban injustices With international case studies from the US the UK Australia Canada India Spain Denmark Sweden and Hungary this book explores how housing displacement processes are more diverse and mutate into more new forms than have been acknowledged in the literature It emphasizes a need to look beyond the existing rich gentrification literature to give primacy to researching processes of displacement to understand the socio spatial change in the city Although it is empirically and methodologically demanding for several reasons studying displacement highlights gentrification s unjust nature as well as the unjust housing policies in cities and neighborhoods that are simply not undergoing gentrification The book also demonstrates how expulsion though under researched has become a vital component of contemporary advanced capitalism and how a focus on gentrification has hindered a potential focus on its flipside of displacement as well as the study of the occurrence of poor cleansing from a long term historical perspective This book offers interdisciplinary perspectives on housing displacement to academics and researchers in the fields of urban studies housing citizenship and migration studies interested in housing policies and governance practices at the urban scale

Rural Tourism
Development E. Wanda George, Heather Mair, Donald G. Reid, 2009 This book of cases about rural tourism development in Canada demonstrates the different ways that tourism has been positioned as a local response to political and economic shifts in a nation that is itself undergoing rapid change both continentally and globally

Crime Prevention Through Environmental Design Garland F. White, 2006 This book argues that the level of social and physical capital in communities can influence the amount of crime Communities are conceived as varying across positive weak or negative levels of social and physical capital Negative social and physical capital produce higher levels of disorder and crime Conversely positive social and physical capital enables residents to lower social problems in communities Weak social and physical capital allows

more disorder because the community's defenses against crime and disorder are not strong enough to combat these problems. The general perspectives include broken windows, defensible space, hot spots, collective efficacy, social disorganization, underclass, gang communities, the post-industrialized communities, and routine activities theory. The ameliorative programs include the weed and seed program, the moving to opportunity program, community policing, and empowerment zones.

Labour History, 2004. *The Politics of Urban Development*. Clarence Nathan Stone, Heywood T. Sanders, 1987. In the past twenty years, the study of urban politics has shifted from a predominant concern with political culture and ethos to a preoccupation with political economy, particularly that of urban development. Urban scholars have come to recognize that cities are shaped by forces beyond their boundaries. From that focus, the views that cities are clearly engaged in economic competition, that market processes are shaped by national policy decisions, sometimes intentionally and sometimes inadvertently, and that the costs and benefits of economic growth are unevenly distributed. But what else needs to be said about the policies and politics of urban development? To supplement prevailing theories, *The Politics of Urban Development* argues that the role of local actors in making development decisions merits closer study. Whatever the structural constraints, politics still matters. Collectively, the essays provide ample evidence that local government officials and other community actors do not simply follow the imperatives that derive from the national political economy; they are able to assert a significant degree of influence over the shared destiny of an urban population. The impact of the collection is to heighten awareness of local political practices and of how and why they make a difference.

[The Western Journal of Black Studies](#), 2006. *Class and Everyday Life*. Kirsteen Paton, 2023-11-28. Exploring the issues of class through in-depth studies of housing, sport, art, music, and politics in Britain, *Class and Everyday Life* persuasively demonstrates the pervasive influence of class on everyday life and the need to centre a radical understanding of class within emancipatory political movements. The need for a more expansive understanding of class is politically urgent. There is a disconnect between descriptive and analytical approaches to class and the politics of class and realities around how class is lived. Discourse has been shaped by top-down frameworks of analysis and measurements which have stripped the study of class of its political radicalism. This book makes the case for a sociology of class which is informed by a politics of class based upon using the everyday as the point of enquiry. It presents a sociology of class from the bottom up which focuses on everyday life and the point at which class is made and remade. In doing so, it advocates for an attentiveness to class and everyday life through a conjunctural analysis. Using an everyday lens, this book examines how the shifting conjunctures manifest in everyday spaces in classed ways and how such changes are negotiated, resisted, and shape the working class subject and communities. This is based upon an understanding of everyday classed experiences which identifies and challenges inequalities while also recognising value and hope. This perspective aims to offer a recognition of both the opportunities and challenges of class as a way of developing a stronger, more politicised understanding of class which takes solidarity and class community power.

seriously to resist inequality and develop emancipatory politics This urgent and impassioned book will be essential reading for students academics and activists with an interest in the lived experience of class in Britain today
