

PREVENTIVE MAINTENANCE

A good preventive maintenance program of regular inspection and care will increase life and improve performance of your McCulloch chain saw. This maintenance check chart is a guide for such a program. Cleaning, adjustment, and parts replacement may, under certain conditions be required at more frequent intervals than those indicated*. The chain oiler must be kept constantly in good operating condition and the chain must be kept snug on the bar.

*After the first 7 days or 15 hours of operations, whichever comes earliest, take your saw back to your nearest McCulloch Servicing Dealer for an inspection and checkup. He will be pleased to help you establish a preventive maintenance program to suit your needs. The recommended first 7-day or 15-hour checkup and a follow-up of regular, periodic check-ups and tune-ups at your McCulloch Dealer's shop will be minimal in cost and will assure long, satisfactory service from your McCulloch chain saw.
