

Effective Math Interventions: A Guide for Schools and Districts

Introduction

Mathematics is a critical component of a student's education, and effective interventions are essential for students who struggle. This guide provides a framework for identifying and supporting these students.

Identifying Students

Teachers should use a variety of assessment tools to identify students who are struggling in math. This includes formative assessments, standardized tests, and teacher observations.

Tier 1: Core Instruction

All students should receive high-quality, evidence-based core instruction. This instruction should be differentiated to meet the needs of all learners.

Tier 2: Targeted Interventions

Students who are struggling in math should receive targeted interventions. These interventions should be evidence-based and focused on the specific areas of difficulty.

 Tier 1	 Tier 2	 Tier 3	 Tier 4	 Tier 5
--	---	---	---	---

Tier 3: Intensive Interventions

Students who are significantly below grade level should receive intensive interventions. These interventions should be individualized and provided in small groups or one-on-one settings.

Implementation

Successful implementation of math interventions requires a strong focus on data and communication. Teachers should regularly monitor student progress and adjust interventions as needed.
