Name \_\_\_\_\_ Date \_\_\_\_\_

Topic \_\_\_\_\_ Period \_\_\_\_\_

*Purpose:* Identify most important moments; show cause-effect and organization (sequence).

1. Determine the most crucial stages, scenes, or moments in the story or process.
2. Draw in the box what happens and what you "see" in the text. Be as specific as possible.
3. Remember, these are notes, not works of art; try to capture the action and important details of the moment.
4. Explain (in the notes section) what is happening and why it is important.

**Rhimes** Anna Weinstein, 2024-08-22 The Works of Shonda Rhimes the first book in Bloomsbury s Screen Storytellers series brings together a collection of essays that look critically at the works of this award winning writer producer and CEO of the global media company Shondaland Shonda Rhimes s television series and those created and produced through Shondaland have left an important imprint on television history Beginning with her groundbreaking series Grey s Anatomy the series

created under the umbrella of Rhimes's brand including *Private Practice*, *Scandal*, *How to Get Away with Murder*. For the People Station 19, *Bridgerton*, *Inventing Anna*, and *Queen Charlotte: A Bridgerton Story* have delighted global audiences with their innovative storytelling, dynamic characters, and the inclusion of contemporary social issues woven throughout the storylines. In this collection of essays on screenwriting and television studies, scholars explore the ways in which Rhimes's series have been at the forefront of change in the television landscape in the past two decades, including discussions of the representation of women, BIPOC, and LGBTQ characters, inclusivity in casting, innovations in pilot and series development, variations on genre, and disruptive business and marketing practices. This collection of essays offers emerging screenwriters and informed consumers of television insights into the cultural impact of Rhimes's work, as well as how one of the most powerful television creators and showrunners in the history of the medium has crafted and shaped screen stories that speak to viewers spanning all demographics across the globe.

**Memory and Healing** Soren R. Ekstrom, 2018-05-01. This book addresses the current demand to apply findings in neuroscience to a broad spectrum of psychotherapy practices. It offers clear formulations for what has long been missing in how psychotherapists present their work: research-based descriptions of specific memory functions and attention to the role that synaptic plasticity and neural integration play in making lasting psychological change possible. The book provides a detailed perspective on how patients integrate into their own narratives, what transpires in their treatment, and how the clinician's memory guides the different phases of the process of healing. Long neglected in psychotherapeutic formulations, findings about memory in particular episodic and autobiographical memory have a direct bearing on what happens in treatments. Whether the information is about the recent past such as what happened between sessions or about traumatic childhood experiences, the patient's disclosures are in the service of a more complete narrative about self. At the same time, the therapist's ways of remembering what occurs in each therapeutic relationship will guide much of the healing process for the patient.

Essentials of Cognitive Neuroscience Bradley R. Postle, 2020-05-27. *Essentials of Cognitive Neuroscience* introduces and explicates key principles and concepts in cognitive neuroscience in such a way that the reader will be equipped to critically evaluate the ever-growing body of findings that the field is generating. For some students, this knowledge will be needed for subsequent formal study, and for all readers, it will be needed to evaluate and interpret reports about cognitive neuroscience research that make their way daily into the news media and popular culture. The book seeks to do so in a style that will give the student a sense of what it's like to be a cognitive neuroscientist when confronted with a problem: how does one proceed? How does one read and interpret research that's outside of one's sub-area of specialization? How do two scientists advancing mutually incompatible models interrelate? Most importantly, what does it feel like to partake in the wonder and excitement of this most dynamic and fundamental of sciences?
