Malaria Microscopy Quality Assurance Manual - Version 2 World Health Organization, 2016-04-05

The first version of the WHO Malaria microscopy quality assurance manual 2009 was based on recommendations made at a series of informal consultations organized by WHO, particularly a bi-regional meeting of the WHO regional offices for South East Asia and the Western Pacific in April 2005 in Kuala Lumpur, Malaysia, followed by informal consultations held in March 2006 and February 2008 in Geneva, Switzerland. Subsequently, extensive consultations among international malaria experts led to consensus and preparation of the manual. This second version of the Manual is based on the recommendations of experts made at a WHO technical consultation in March 2014 in Geneva, Switzerland. The aim of the meeting was to review the experiences of national malaria control programmes (NMCPs), national reference laboratories (NRLs) and technical agencies in using the Manual and country experience in order to improve systems for managing the quality of malaria microscopy. This second version takes into account the many years of experience of several agencies in the various aspects of quality assurance (QA) described in the Manual. In particular, the sections on assessment of competence in malaria microscopy are based on use of this method by the WHO regional offices for South East Asia and the Western Pacific in collaboration with the WHO Coordinating Centre for Malaria in Australia and by the WHO Regional Office for Africa in collaboration with Amref Health Africa. The section on setting up and managing an international reference malaria slide bank is based on the work of the WHO Regional Office for the Western Pacific in collaboration with the WHO Coordinating Centre for Malaria Diagnosis in the Philippines. The section on proficiency testing for malaria microscopy is based on work in the WHO Regional Office for Africa in collaboration with the National Institute for Communicable Diseases in South Africa and experience in regional initiatives by Amref Health Africa. The section on slide validation is based on work by M. Decins, sans Frontières, and the section on outreach training and supportive supervision (OTSS) is based on work by the President's Malaria Initiative, Malaria Care Project, Medical Care Development International and Amref Health Africa. The

Manual is designed primarily to assist managers of NMCPs and general laboratory services responsible for malaria control. The information is also applicable to nongovernmental organizations (NGOs) and funding agencies involved in improving quality management systems for malaria microscopy. The Manual is not designed for QA of microscopy in research situations such as in clinical trials of new drugs and vaccines or for monitoring parasite drug resistance. It forms part of a series of WHO documents designed to assist countries in improving the quality of malaria diagnosis in clinical settings, including the revised training manuals on Basic malaria microscopy 2010 and the Bench aids for malaria microscopy 2010.

Training Manuals on Malaria National Malaria Control Programme (Nigeria), Strategy to respond to antimalarial drug resistance in Africa World Health Organization, 2022-10-31. The Strategy to respond to antimalarial drug resistance in Africa is a technical and advocacy document grounded in the best available evidence to date and aimed at minimizing the threat and impact of antimalarial drug resistance of *Plasmodium falciparum* parasites in Africa. Its objectives are to: i) improve the detection of resistance to ensure a timely response; ii) delay the emergence of resistance to artemisinin and artemisinin-based combination therapy (ACT) partner drugs; and iii) limit the selection and spread of resistant parasites where resistance has been confirmed.

World malaria report 2020 World Health Organization, 2020-12-01. The year 2020 is a milestone for several important health and development goals, including efforts to reduce the burden of malaria overall and eliminate the disease where possible. It is 20 years since the Abuja Declaration and the launch of the Millennium Development Goals (MDGs) and 5 years since the global agreement on the Sustainable Development Goals (SDGs) framework and the launch of the World Health Organization (WHO) Global technical strategy for malaria 2016-2030 (GTS) and the RBM Partnership to End Malaria Action and investment to defeat malaria 2016-2030 (AIM). The WHO World malaria report 2020 presents both the estimates of disease burden for 2019 and a review of the updated official estimates of global progress in the fight against malaria in the first 2 decades of the 21st century.

2000-2019 introduction *Narmada and Environment* Yoginder K. Alagh, Mahesh T. Pathak, D. T. Buch, 1995. *Subnational tailoring of malaria strategies and interventions* World Health Organization, 2025-10-13. This manual provides structured guidance on subnational tailoring (SNT) of malaria interventions and strategies, supporting countries to use local data and contextual information to determine the appropriate packages of interventions and strategies and best allocation of resources for a given area for maximum impact on transmission and burden of disease. It presents SNT as an inclusive process through which national malaria programmes and partners apply WHO recommendations in locally relevant contexts, enabling evidence-informed, country-owned strategic and operational, costed plans. The manual outlines steps for using subnational data through analytical approaches such as stratification, mathematical modelling, and cost-effectiveness analysis to address locally defined priority questions and guide planning and implementation. It stresses alignment with broader health strategies to ensure coherence, sustainability, and national ownership. Practical criteria and illustrative case examples are provided to support implementation and strengthen capacity.

Ultimately the manual aims to help countries enhance the impact equity and efficiency of malaria control and elimination efforts by tailoring interventions to subnational contexts and adapting strategies over time Malaria Control Program Indonesia.
