

# MATHS WITH MANIPULATIVES: ATTRIBUTE BLOCKS

Paul Swan

Figure 1

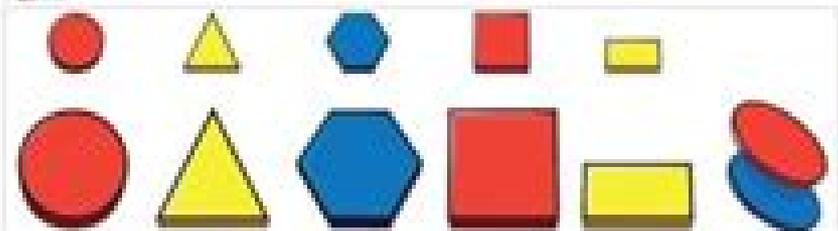

Figure 2

Attribute blocks are often combined with Pattern Blocks and 3-fragments. But these mixed together in a flat world, wouldn't they be? Pattern Blocks come in 3D versions that stand on 1 mm glass pieces which are often used for building blocks. Pattern blocks come in the planes: Yellow Hexagons, Red Trapezoids, Blue and Tan Rhombuses, Green Trapezoids and Orange Squares (see Figure 3).

Attribute blocks are plastic shapes that come in:

- Two flat: large or small
- Two thicknesses: thick or thin
- Three colours: red, blue or yellow
- Five shapes: triangle, square, hexagon, trapezoid and circle (see Figure 2).

The fact that there is a yellow trapezoid in the Pattern Block set and the Attribute Block set covers part of the confusion.

## MANAGING THE MATERIALS

The size, thickness, colour and shape represent the block's attributes, hence the name Attribute Blocks.

Figure 3

With just four words, you can describe a single block. A large block that is red would look like this:

Here an individual piece makes up a set of Attribute Blocks (1 × 2 × 1 × 1). Each block is different, so I suggest the original packaging is kept and the pieces packed away at the end of each session (see Figure 3). Also, I would buy an extra set, so you have spares available to top up one, for fun.

*(Block numbers on page 14)*

# MATHS WITH MANIPULATIVES: ATTRIBUTE BLOCKS (CONT.)

## SAMPLE ACTIVITIES

### FOR A PEEK

The blocks are placed on the table. If you don't like the name of glasses on the desk, place a white card on the desk. It reads: 'The name follows the "long face" and makes a good background if the blocks are photographed.'

The person chooses a block and the other person asks questions to bring out their words. Consider how the block's attributes are connected to the word 'leaf'. How is the block most like one of the circles or triangles?

### SPIN AND FIND

Use an Attribute Spinner or another that is spun up a glass (see Figure 4).

Pick up a glass and spin it onto the spinner. (Students may complete the activity separately using two sections of the spinner, two sections on. A small Attribute Block Spinner can be found at [www.mathworksheetsland.com/attribute-blocks/attribute-blocks-1.html](http://www.mathworksheetsland.com/attribute-blocks/attribute-blocks-1.html).)

### NOT SPINNING

Randomise the word sets a very powerful three-level word recognition task. For the word set below, each word that comes up on the spinner. For example, the glass is red (top), tall (left), and yellow and has a circle. The words there will be more possible answers. The glass could be small, thin, red or blue, enough space, rectangle, hexagon. Does space not all appear to be used to be thick and the word 'red' does not have to be used to form a word just on the spinner.

### PLAY SPERDUCKE BOOKS

This is a game for four players. The blocks are placed out on the table and mixed around.

### The talking version

Three players draw their card and the remaining player 'reads a page'. The three descriptors work with cooperatively to find the white piece without talking.

Figure 4

The students are allowed to move and mix pieces. When they follow the first round the missing piece, they can only see five words. The first will then be on or on opposite or on quite 1.

### Talking version

Three sets manipulate the blocks talking questions to check the student is with 'one or two'. Allowing students to see the spinner to help track provides visual support to enable students who get 'lost' to see on the game.

### LANGUAGE AND LOGIC

Students draw one writing card to form their diagrams. Two diagrams are mixed after a few hours (1974 - 1975), a mathematician and logician.

Blocks placed on the intersection of two circles mean that two criteria or attributes, that is red and triangle, talking a third strongly means that the intersection of all three criteria means that three criteria will need to be met (see Figure 7). The link between language and logic becomes clear.

Consider how students work - how correct words represent work.

Figure 7

### SYMBOLS AND LANGUAGE

Students may not different writing systems to describe the relationship between pieces. See Figure 7.
