

# Quick Reference Guide

## Responding to and preparing for natural disasters

### Lessons learned from the successful coordinated response to restoring the public health supply chain after Cyclone Idai in Mozambique

In relatively normal circumstances, any number of factors can pose a challenge to the smooth, timely operation of a global health supply chain. But an adverse event, such as a natural disaster, often poses critical challenges to the local public health supply chain that must be overcome quickly to ensure no interruption of treatment for patients.

In Mozambique, the response to Cyclone Idai — which occurred in March 2019 — largely avoided many of the most significant challenges that can hinder a public health supply chain's response to natural disasters. The Mozambican Ministry of Health and Central Medical Store, as well as the USAID Global Health Supply Chain - Procurement and Supply Management (GHSC-PSM) project, worked together to restore the supply chain quickly and learned a number of lessons that can be drawn on to respond to and prepare for future natural disasters.

#### Commodities

- Protect commodities as much as possible ahead of the natural disaster according to official warnings — for example, by using plastic sheeting or transferring commodities to safer locations.
- Create one central staging warehouse at the airport.
- Create a separate emergency warehouse.
- Develop and share with all partners standard operating procedures (SOPs) for categorizing items upon arrival by those that are useful now, will be useful later, and will never be useful.
- Establish guidelines and SOPs on how to manage emergency kits (kits designed for disaster response/humanitarian assistance, commonly distributed by WHO).
- Use existing SOPs for inventory management if possible.
- Have boxes and other packing materials in stock for repacking commodities that have damaged external packaging but the products themselves and their internal packaging are intact.
- Have pallets and plastic sheeting in stock to protect products when stored outside or to cover products inside a damaged warehouse.
- Keep expired drugs to a minimum to avoid build-up.
- Quantify essential medicines and medical supplies needed for future disasters and keep adequate stock.
- Hold non-essential shipments or re-direct them to other locations or regional warehouses.
- Prepare guidelines for donors requiring that:
  - Drugs should be solicited and be part of the national formulary

#### Commodity challenges faced after Cyclone Idai, and commonly faced after natural disasters

- Lack of storage space
- Need for disposal of expired and damaged medicines
- Lack of sufficient repacking materials
- Donations of medicines with dosage instructions in languages other than Portuguese or English
- Donations of medical goods with limited shelf life
- Donations of pharmaceuticals not typically prescribed in country
- Insufficient shipments of needed commodities, and an excess of unneeded commodities
- Lack of cold chain-sustaining facilities due to lack of electricity

# Guide For Responding
