AI Agents for Beginners Dan Ai, Hoa Dang, 2026-02-06. Every day you lose hours to repetitive tasks: answering emails, scheduling meetings, researching information, creating content. What if you had an assistant that handled all of that for you? Not a human assistant.

An AI agent that works 24/7 never gets tired and costs less than a coffee per day. AI Agents for Beginners is the definitive guide to building your first AI agent using OpenClaw, the open source platform that's revolutionizing personal automation. Written specifically for non-technical readers, this book assumes zero coding knowledge and guides you through every step. What You'll Learn: Install and configure OpenClaw on any computer (Mac, Windows, or Linux). Connect your agent to WhatsApp, Telegram, Slack, and other channels. Build specialized agents for personal assistance, content creation, and research. Create multi-agent workflows that handle complex tasks automatically. Set up automation that runs on schedule without your intervention. By the end of this book, you'll have a fully functional AI agent running on your own computer. Multiple specialized agents for different tasks. Automated workflows saving you 5-10 hours per week. The knowledge to expand and customize your agents as needed.

Who This Book Is For: Busy professionals drowning in administrative work. Content creators looking to streamline their production process. Entrepreneurs wanting to automate repetitive business tasks. Anyone curious about AI but intimidated by technical complexity.
