fascinating pageant of mythical creatures from a unique and enduring cosmography written in ancient China The *Guideways through Mountains and Seas* compiled between the fourth and first centuries b c e contains descriptions of hundreds of fantastic denizens of mountains rivers islands and seas along with minerals flora and medicine The text also represents a wide range of beliefs held by the ancient Chinese Richard Strassberg brings the *Guideways* to life for modern readers by weaving together translations from the work itself with information from other texts and recent archaeological finds to create a lavishly illustrated guide to the imaginative world of early China Unlike the bestiaries of the late medieval period in Europe the *Guideways* was not interpreted allegorically the strange creatures described in it were regarded as actual entities found throughout the landscape The work was originally used as a sacred geography as a guidebook for travelers and as a book of omens Today it is regarded as the richest repository of ancient Chinese mythology and shamanistic wisdom The *Guideways* may have been illustrated from the start but the earliest surviving illustrations are woodblock engravings from a rare 1597 edition Seventy six of those plates are reproduced here for the first time and they provide a fine example of the Chinese engraver s art during the late Ming dynasty This beautiful volume compiled by a well known specialist in the field provides a fascinating window on the thoughts and beliefs of an ancient people and will delight specialists and general readers alike

Daisy Yan Du,2019-02-28 China s role in the history of world animation has been trivialized or largely forgotten In *Animated Encounters* Daisy Yan Du addresses this omission in her study of Chinese animation and its engagement with international forces during its formative period the 1940s 1970s She introduces readers to transnational movements in early Chinese animation tracing the involvement of Japanese Soviet American Taiwanese and China s ethnic minorities at socio historical or representational levels in animated filmmaking in China Du argues that Chinese animation was international almost from its inception and that such border crossing exchanges helped make it Chinese and subsequently transform the history of world animation She highlights animated encounters and entanglements to provide an alternative to current studies of the subject characterized by a preoccupation with essentialist ideas of Chineseness and further questions the long held belief that the forty year period in question was a time of cultural isolationism for China due to constant wars and revolutions China s socialist era known for the pervasiveness of its political propaganda and suppression of the arts unexpectedly witnessed a golden age of animation Socialist collectivism reinforced by totalitarian politics and centralized state control allowed Chinese animation to prosper and flourish artistically In addition the double marginality of animation a minor art form for children coupled with its disarming qualities and intrinsic malleability and mobility granted animators and producers the double power to play with politics and transgress ideological and geographical borders while surviving censorship both at home and

abroad A captivating and enlightening history Animated Encounters will attract scholars and students of world film and animation studies children s culture and modern Chinese history **Biographical Books, 1876-1949** R.R.
