

## Ib History Paper 3 Guide

Sabrina Shaw Hunter 2A IB History of the Americas HL 7 November 2012 Paper 3 Guide: Mexican Revolution  
Bullet Points: Defined and Summarized: 1. Causes of the Mexican Revolution: social, economic, and political; the role of the Porfiriato regime \* Porfirio Diaz was the dictator of Mexico from 1876 to 1910. His regime is known as the Porfiriato regime. Diaz's social ideologies and aims were to divide and rule, obtain absolute power Diaz's methods were the Pan o Palo policy and the spoil system.

Diaz wanted to increase industrialization without increasing foreign investment and he used the spoil system to gain the support of the wealthy landowners. Diaz's political goals were to have autocratic rule, have absolute power, and obtain these through this policies and systems mentioned earlier. \* Through Diaz's spoil system, the wealthy became wealthier and the poor, common Mexicans were starving.

Hacienda owners were benefiting from the economic situation of Mexico but the people were being oppressed socially, economically, and politically, until Madero began spreading non re-election campaigns and revolutionary leaders began to form groups and later armies, starting the Mexican Revolution.

2. The revolution and its leaders (1910-1917): Ideologies, aims, methods of Madero, Villa, Zapata, Carranza; achievements and failures; Constitution of 1917: nature and application \* Madero: Came to power through the overthrowing of Diaz- Popular for his book, Presidential Succession of 1910.

Sought democracy, gained presidency through popular vote. His 15 months in office were followed by resistance political disaster, non-cooperation, and disunity between his followers and eventually Huerta. (His supposedly appointed commander of the government forces who conspired with the rebels for Madero's fall) \* The aims of Madero were to remove Diaz from power and then take Diaz's power. Villa's aims changed impulsively and for immediate convenience. Zapata's aims were for agrarian reform complete revolutionary changes and land distribution evenly to the poor.

Carranza's aims were to overthrow Huerta and to create a plan similar to Madero's but without the ambitious social reforms. The ideologies of each revolutionary leader are very similar to the aims of each leader. The methods of Madero were forming the Anti-Reelectionist Center of Mexico and creating the Plan of San Luis Potosi. The methods of Villa were guerilla tactics and being a charismatic leader that connected with the lower class. The methods of Zapata were choosing small, easy battle to boost morale among his men and fighting while Diaz was occupied with the North.

The methods of Carranza were fighting Huerta and creating the Plan of Guadalupe. Madero and Carranza both became president, however they did not keep this position for very long because of their lack of social reform. Zapata's Plan of Avala was accepted by the other

web feb 7 2023 the quantum communication and networks project develops quantum devices and studies them for use in quantum communications and networking applications our goal is to bridge the gap between fundamental quantum mechanics information theory and their practical applications in information technology

**multiplexed telecommunication band quantum networking with** - Apr 11 2023

web operation and large scale quantum information processing is an outstanding challenge that has limited the potential of elementary quantum networks we propose a platform for interfacing quantum processors comprising neutral atom arrays with telecommunication band photons in a multiplexed network architecture the use of

*multiplexed telecommunication band quantum networking with* - Sep 04 2022

web dec 3 2021 abstract the realization of a quantum network node of matter based qubits compatible with telecommunication band operation and large scale quantum information processing is an outstanding challenge that has limited the potential of

**why it s time to implement a quantum safe network forbes** - Mar 30 2022

web 2 days ago quantum technologies are undergoing rapid expansion alongside the evolution of pqc and qkd technologies progress in quantum memory and quantum repeaters is creating the foundation for a quantum

**quantum networking with trapped ions nist** - Jul 02 2022

web apr 19 2023 the goal of a quantum network is to establish entanglement as a resource between distant locations shared entanglement over long distances may enable distributed quantum computing quantum enhanced long baseline interferometry the transmission of complex quantum states or a variety of other applications

*long distance multiplexed quantum teleportation from a telecom* - Apr 30 2022

web apr 5 2023 quantum teleportation is an essential capability for quantum networks allowing the transmission of quantum bits qubits without a direct exchange of quantum information

*quantum networking defining the next wave of networking and* - Feb 09 2023

web aug 9 2022 quantum networking defining the next wave of networking and communications ed fox cto of mettel explains quantum networking and how it will transform communications

**quantum technologies in the telecommunications industry** - Aug 15 2023

web jul 22 2021 in this chapter and for the sake of completeness we briefly review the basic elements of the quantum communications qubits and the properties that make them unique information processing elements and the basic protocols used for quantum cryptography in the shorter term and for quantum repeaters in the longer term

**quantum computers in telecom infrastructure ericsson** - Jun 01 2022

web sep 12 2019 for quantum computing ericsson research has identified several potential use cases in telecom physical layer processing of the user data plane in the ran quantum fourier transform and quantum linear solver clustering for automatic anomaly detection in network design optimization project quantum k means algorithm

**quantum communications in future networks and services mdpi** - Dec 07 2022

web mar 11 2020 quantum optical communications leverages on the idea of using photons the quanta of the electromagnetic field as flying qubits which have the scope to transport qubits from a physical quantum emitter through the network for conveying quantum information to a physical quantum receiver

*quantum communication networks springerlink* - Dec 27 2021

web quantum communication networks home book authors riccardo bassoli holger boche christian deppe roberto ferrara frank h p fitzek gisbert janssen sajad saeedinaeeni provides a complete tutorial in quantum communication networks links together quantum networking quantum information theory quantum computing and

**a quantum access network nature** - Nov 06 2022

web sep 4 2013 an experimental demonstration of the concept of a quantum access network based on simple and cost effective telecommunication technologies yields a viable method for realizing multi user

**worldwide quantum networks industry to 2031 players** - Jan 28 2022

web jul 7 2022 2 3 3 mid atlantic region quantum network quantum networks to connect quantum technology quannecqt 4 2 quantum networks in south korea sk telecom 4 2 1 south korean telecom companies

*future quantum communications and networking a review and* - Aug 03 2022

web oct 25 2022 future quantum communications and networking a review and vision abstract based on quantum mechanics quantum communications have clock synchronization properties and unbreakable security

*quantum network wikipedia* - Jun 13 2023

web quantum networks form an important element of quantum computing and quantum communication systems quantum

networks facilitate the transmission of information in the form of quantum bits also called qubits between  
quantum communications and networking series 1 - May 12 2023

web jun 10 2023 this series focuses on recent advances in quantum communications and networking and we seek original contributions in quantum networking architectures concepts protocols and technologies in support of long distance qubit transmissions and novel network applications

**pdf multiplexed telecommunication band quantum networking** - Oct 05 2022

web dec 3 2021 the realization of a quantum network node of matter based qubits compatible with telecommunication band operation and large scale quantum information processing is an outstanding challenge
