Force & Motion

Terms to Know

- **Energy:** Energy. The energy of motion.
- **Motion:** The direction and speed of an object.
- **Speed:** How fast an object is moving.
- **Force:** A push or pull that causes an object to move, stop, or change direction.
- **Friction:** A force that opposes the motion of an object.
- **Mass:** The amount of matter an object contains.

Energy Transfer

When objects collide, the energy from one object transfers to another object. That transfer in energy can change an object's speed or direction.

Example:

A soccer ball is rolling slowly down the field. A boy kicks the ball. The ball begins moving more quickly and in the opposite direction. Energy was transferred to the ball, causing it to change speed and direction.

Friction

Friction is a force that opposes the motion of an object. Friction makes an object slow down.

Example:

A hockey puck is sliding across ice. As it rubs against the ice, it creates friction. The friction causes the puck to slow down until it stops.

Laws of Motion

The Laws of Motion tell us:

- An object at rest remains at rest unless acted on by a force.
- An object in motion remains in motion unless acted on by a force.

Example:

A suitcase is not moving. It will remain at rest until someone pulls the handle, causing it to move.

Mass and Force

Mass affects the motion of an object when a force is applied.

Objects that have the same mass.
The greater the force, the greater the change in motion.

Objects that have different mass.
The more massive an object, the less effect a given force will have on that object.

Example:

An empty shopping cart is easy to push. As you fill the shopping cart, more force is needed to push it.

Name _____

Force & Motion

1. What is a force? Give two examples.
2. Luis is playing baseball with his brother. When he hits the baseball, it has kinetic energy. Explain.
3. Fiana rolled a skateboard down the sidewalk. The skateboard slowed down and stopped. Explain why it stopped.
4. Cassandra and her friend are moving boxes. Cassandra moved the first box by herself. Her friend moved the second box together with her. Explain why it was easier to move.
5. Thomas is riding a bicycle. As he pedals, the bicycle moves forward. Explain why.
