Many Colored Glass:

A Many-colored Glass Freeman J. Dyson, 2007 The emphasis of this book with philosophical essays is on the myriad ways in which the universe presents itself to us and how as observers and participants in its processes we respond to it The book begins with a consideration of the practical and political questions surrounding biotechnology As it seeks how best to explain the place of life in the universe the book then moves from ethical to purely scientific issues The last part concludes with an attempt to understand the implications of biology for philosophy and religion The pieces in this book touch on numerous disciplines from astronomy and ecology to neurology and theology
