Students' manual. pt. 2. Instructor's manual Edward Bradford Titchener, 1905 The general purpose with which this book has been written is sufficiently indicated by its title I have selected a number of the classical experiments of Experimental Psychology and have tried to present them in such a way that their performance shall have a real disciplinary value for the undergraduate student Within this general purpose my aim has been two fold I have sought to show in the first place that psychology is above the laboratory that we employ our instruments of precision not for their own sake but solely because they help us to a refined and more accurate introspection And secondly just as in my Outline of Psychology and Primer of Psychology I gave the results of experimentation a prominent place in the psychological system so here I have treated the selected experiments not as separate exercises but as points of departure for systematic discussion PsycINFO Database Record c 2005 APA all rights reserved Advances in Generative Lexicon Theory James Pustejovsky, Pierrette Bouillon, Hitoshi Isahara, Kyoko Kanzaki, Chungmin Lee, 2012-12-18 This collection of papers takes linguists to the leading edge of techniques in generative lexicon theory the linguistic composition methodology that arose from the imperative to provide a compositional semantics for the contextual modifications in meaning that emerge in real linguistic usage Today's growing shift towards distributed compositional analyses evinces the applicability of GL theory and the contributions to this volume presented at three international workshops GL 2003 GL 2005 and GL 2007 address the relationship between compositionality in language and the mechanisms of selection in grammar that are necessary to maintain this property The core unresolved issues in compositionality relating to the interpretation of context and the mechanisms of selection are treated from varying perspectives within GL theory including its basic theoretical mechanisms and its analytical viewpoint on linguistic phenomena **The Publishers' Trade List Annual**, 1886 **Catalog of Copyright Entries.
