**Setting Standards for Financial Reporting** A. Bowdoin Van Riper, 1994-07-21 The book begins with an overview of how and why the present self regulatory arrangement for setting standards for financial reporting in the private sector came about in 1973 A brief description of the new structure is followed by a discussion of the essential elements of meaningful self regulation A schism emerged between advocates of neutrality and objectivity in standard setting and those who think the primary concern should be for possible economic and social consequences Early clashes between traditional views and newer insights are described setting the stage for an account of
