*Resources in Education*, 1981 *Accelerating Academic Achievement* Ina V. S. Mullis, 1990 Data from 20 years 1970-90 of the National Assessment of Educational Progress NAEP are summarized The NAEP represents the nation's only ongoing assessment of the academic achievement of American students Its assessments of educational achievement of students in grades 4, 8, and 12 are presented as The Nation's Report Card Chapter 1 of this report contains information about the students' competency in subject matter across the curriculum and their ability to use their minds well Chapters 2 and 3 include information about the trends across time related to the performance of elementary school, middle school, and secondary school students in higher order reasoning, problem solving, and communication skills as well as information about the academic achievement of minority students Chapter 4 summarizes information about background variables related to education In general, the data indicate that the educational performance of U.S. students is low and not improving It is estimated that more than half of the nation's elementary through high school students are unable to demonstrate competency in challenging subject matter in English, mathematics, science, history, and geography Fewer than half of all U.S. students appear to be able to use their minds well Although considerable progress has been made in closing the performance gaps among different racial, ethnic, and gender groups, the gaps still remain too large to meet the nation's objective of close parallels between the performance of minority students and the student population as a whole Much that research has identified as effective in improving education is still not being implemented in the nation's schools Nineteen tables and five figures summarize NAEP data SLD **Research in Education**, 1971 **Social Science Pamphlets: Essentials in Geography--history--civics: 1. Jenkins, 1984 Instructional leadership is the principal's role in providing direction, resources, and support to teachers and students for the improvement of teaching and learning in the school This handbook reviews factors affecting that role in four broad domains: keeping informed about trends, planning for instructional improvement, implementing instructional improvements, and evaluating program success The first section surveys the range of information with which principals must be familiar in order to provide knowledgeable guidance, including trends in instruction in specific content areas, trends in organization and staffing, and trends in media and methods The second section discusses the application of planning techniques to instructional development, touching on needs

assessment goal setting standards and competency measurement and obtaining support Program implementation is covered in the third section which explores program organization and the supervision of classroom management the diagnostic process student placement and instructional practices The final section treats the elements of the evaluation process including assessment and reporting of progress evaluation of teacher performance obtaining and using community feedback and modifying the program PGD
