General Insurance Manual Hmrc:

The Handbook of Insurance-Linked Securities Pauline Barrieu, Luca Albertini, 2010-06-15 Luca Albertini and Pauline Barrieu are to be congratulated on this volume. Written in a period where structured projects in finance are having a difficult time, it is worthwhile to return to the cradle of securitisation: insurance. Spread out over three parts—life, non-life, and tax and regulatory issues—the 26 chapters, written mainly by practitioners, give an excellent overview of this challenging field of modern insurance. Methodology and examples nicely go hand in hand. The overall slant is towards actual analyses of concrete products. No doubt, this book will become a milestone going forward for actuarial students, researchers, regulators, and practitioners alike.

Paul Embrechts, Professor of Mathematics and Director of RiskLab, ETH Zurich. The convergence of insurance with the capital markets has opened up an alternative channel for insurers to transfer risk, raise capital, and optimize their regulatory reserves, as well as offering institutions a source of relatively liquid investment with limited correlation with other exposures. One of the financial instruments allowing for the cession of insurance-related risks to the capital markets is Insurance-Linked Securities (ILS). This book provides hands-on information essential for market participants, drawing on the insights and expertise of an impressive team of international market players representing the various aspects and perspectives of this growing sector. The book presents the state of the art in Insurance-Linked Securitization by exploring the various roles for the different parties involved in the transactions, the motivation for the transaction sponsors, the potential inherent pitfalls, the latest developments and transaction structures, and the key challenges faced by the market. The book is organized into parts, each covering a specific topic or sector of the market. After a general overview of the ILS market, the Insurance-Linked Securitization process is studied in detail. A distinction is made between non-life and life securitization due to the specificities of each sector. The process and all the actors involved are identified and considered in a comprehensive and systematic way. The concepts are first looked at in a general way before the analysis of relevant case studies where the ILS technology is applied. Particular focus is given to the key stages in both non-life and life securitizations, including the general features of the transactions, the cedant's perspectives, the legal issues, the rating methodologies, the choice of an appropriate trigger, and the risk modeling. The particular challenges related to longevity securitization, the investor's perspective, and the question of the management of a portfolio of ILS, the general issues related to insurance-linked securitization, such as accounting and tax issues, regulatory issues, and solvency capital requirements. The book is accompanied by a website: www.wiley.com/go/albertini_barrieu_ILS, which will feature updates and additions to the various contributions to follow market developments.

EU Tax Law comprising the proceedings and working documents of an annual seminar held in Milan in November 2010 provides an in depth analysis of the meaning of these three essential concepts in relevant tax treaties and law The analysis starts from an EU tax law perspective with a particular emphasis on the European Directives The above concepts are then considered from domestic tax law viewpoints The book then moves to tax treaty law Most notably an examination of the history and interpretation of the concepts of enterprise business and business profits is presented starting from the works of the League of Nations to the current OECD Model Tax Convention Next specific tax treaty issues are considered In particular the controversial issues concerning the interpretation of the notions of enterprise and enterprise of a Contracting State are

discussed Also the concepts of profits and business profits are thoroughly reviewed The concept of enterprise in the context of the non discrimination clause laid down by Art 24 of the OECD Model Tax Convention is then examined Individual country surveys provide an in depth analysis of the aforementioned concepts and issues from a national viewpoint in selected European and North American jurisdictions as well as in Australia and Japan The book concludes with a round table discussion among some of the most renowned international tax scholars on the desirability to change the OECD Model Tax Convention and its Commentaries This book is essential reading for all those dealing with issues of taxation of enterprises engaged in cross border activities and can be considered a new cornerstone in the subject matter Publisher s website
