# Interpretation of Topographical Maps

## Syllabus

**Interpretation of Topographical Maps\***  
 Locating features with the help of a four figure or a six figure grid reference.

## MAPS AND THEIR SIGNIFICANCE

The earth is a huge planet with varied relief features like mountains, plateaus, valleys, rivers, lakes, seas and oceans. Due to its enormous size and spherical shape, it is not possible to view the entire earth at the same time. Consequently, it is not possible to represent the whole earth on a flat surface. This difficulty has been resolved by using various models of the earth like the Globes and the Maps.

A *Globe* is a three-dimensional representation of the earth. It is the only true representation of the earth, indicating its shape, direction, area and other features. However, a globe has certain limitations. Due to its limited space, it cannot represent physical features and other characteristics in detail. Further, topographic details cannot be shown on a globe.

Therefore, to represent three-dimensional features like mountains, valleys, rivers and other geographical phenomena, special techniques are used so that these features can be drawn on a uniform basis. This art and science of mapping is called *cartography*.

A *map* is defined as a representation of the earth's surface or a part of it, showing natural or man-made features, drawn to scale on a flat surface.

Proceedings of the Summer Computer Simulation Conference, 1980 *The Interface Between EU and International Law* Inge Govaere, Sacha Garben, 2019-05-16 Despite their many obvious interconnections, EU and international law are all too often studied and practised in different spheres. While it is natural for each to insist on its own unique characteristics and in particular for the EU to emphasise its sui generis nature, important insights might be lost because of this exclusionary approach. This book aims to break through some of those barriers and to show how more interaction between the two spheres might be encouraged. In so doing, it offers a constitutional dimension but also a substantive one, identifying policy areas where EU and international law and their respective actors work alongside each other. Offering a 360-degree view on both EU and international institutional and substantive law, this collection presents a refreshing perspective on a longstanding issue.
