

WELCOME TO THE WORLD OF EUROCAVE

It is our wish is to accompany your enthusiasm for wine throughout the years... To do so, EuroCave puts all of its know-how into action to bring together the 6 essential factors in optimal wine maturing:

Temperature:

The two worst enemies of your wine are extreme temperatures and sudden fluctuations in temperature. A constant temperature of 10° to 14°C (50 to 57°F) is considered to be ideal for your wine to reach its peak.

Humidity:

This is an essential factor, enabling corks to retain their sealing qualities. The humidity rate must be higher than 50% (ideally between 60 and 75 %).

Darkness:

Light, and more especially its ultra-violet component, will rapidly prove damaging to your wine by irreversible oxidation of its tannins. For this reason we strongly advise that wines be stored in the dark, far from U.V. light.

Lack of vibrations:

Vibration disturbs the slow process of your wine's biochemical evolution, and is often fatal for the finest wines.

Storage:

Moving bottles too often is harmful to wine preservation. Having the right type of storage, which restricts undue handling, is essential.

Natural aeration:

A constant supply of filtered air from the exterior is indispensable in order to avoid the development of unpleasant odours and mould.

All of these specific features can be found in the EuroCave Origine wine cabinet you have bought. We thank you for the confidence you have placed in us.
