

Evidence for Evolution

How are DNA and comparative anatomy used to show relatedness?

Why?

“You look just like your mother!” “He has his father’s eyes.” These comments that refer to the similarities between parents and their children are heard often in conversation. These similar traits are due to the genetic material that children inherit from their parents. As humans we are sometimes fortunate enough to have three or four generations sitting in a room at one time, and we can see the similarities from generation to generation. But how much do you look like your ancestors from 100 generations ago, 1000 generations ago or more? How much of your DNA did you inherit from those ancestors? What traits do you share with them?

Model 1 – Family Characteristics

1. Model 1 is a family tree. Circle the original parents of the family.
2. How would you describe the organisms in the second row of Model 1 that are connected to the parents by a line?
3. Identify the three members of the family that “married in” by placing a star next to their figures in Model 1.
4. How are the organisms in the third line related to the organisms in the first line?

Evidence Of Evolution Pogil Packet Key:

Evidence and Evolution Elliott Sober, 2008 *The Evidence for Evolution* Alan R. Rogers, 2024-05-31 According to polling data most Americans doubt that evolution is a real phenomenon And it s no wonder that so many are skeptical many of today s biology courses and textbooks dwell on the mechanisms of evolution natural selection genetic drift and gene flow but say little about the evidence that evolution happens at all How do we know that species change Has there really been enough time for evolution to operate With *The Evidence for Evolution* Alan R Rogers provides an elegant straightforward text that details the evidence for evolution Rogers covers different levels of evolution from within species changes which are much less challenging to see and believe to much larger ones say from fish to amphibian or from land mammal to whale For each case he supplies numerous lines of evidence to illustrate the changes including fossils DNA and radioactive isotopes His comprehensive treatment stresses recent advances in knowledge but also recounts the give and take between skeptical scientists who first asked how can we be sure and then marshaled scientific evidence to attain certainty *The Evidence for Evolution* is a valuable addition to the literature on evolution and will be essential to introductory courses in the life sciences

Relics of Eden Daniel J. Fairbanks, 2009-09-18 Since the publication in 1859 of Darwin s *Origin of Species* debate over the theory of evolution has been continuous and often impassioned In recent years opponents of Darwin s dangerous idea have mounted history s most sophisticated and generously funded attack claiming that evolution is a theory in crisis Ironically these claims are being made at a time when the explosion of information from genome projects has revealed the most compelling and overwhelming evidence of evolution ever discovered Much of the latest evidence of human evolution comes not from our genes but from so called junk DNA leftover relics of our evolutionary history that make up the vast majority of our DNA *Relics of Eden* explores this powerful DNA based evidence of human evolution The relics are the millions of functionally useless but scientifically informative remnants of our evolutionary ancestry trapped in the DNA of every person on the planet For example the analysis of the chimpanzee and Rhesus monkey genomes shows indisputable evidence of the human evolutionary relationship with other primates Over 95 percent of our genome is identical with that of chimpanzees and we also have a good deal in common with other animal species Author Daniel J Fairbanks also discusses what DNA analysis reveals about where humans originated The diversity of DNA sequences repeatedly confirms the archeological evidence that humans originated in sub Saharan Africa the Eden of the title and from there migrated through the Middle East and Asia to Europe Australia and the Americas In conclusion Fairbanks confronts the supposed dichotomy between evolution and religion arguing that both science and religion are complementary ways to seek truth He appeals to the vast majority of Americans who hold religious convictions not to be fooled by the pseudoscience of Creationists and Intelligent Design advocates and to abandon the false dichotomy between religion and real science This concise very readable presentation of recent genetic research is completely accessible to the nonspecialist and makes for enlightening and fascinating reading

The Blind Watchmaker Richard Dawkins, 2015-09-21 Richard Dawkins's classic remains the definitive argument for our modern understanding of evolution. *The Blind Watchmaker* is the seminal text for understanding evolution today. In the eighteenth century theologian William Paley developed a famous metaphor for creationism that of the skilled watchmaker. In *The Blind Watchmaker* Richard Dawkins crafts an elegant riposte to show that the complex process of Darwinian natural selection is unconscious and automatic. If natural selection can be said to play the role of a watchmaker in nature it is a blind one working without foresight or purpose. In an eloquent uniquely persuasive account of the theory of natural selection Dawkins illustrates how simple organisms slowly change over time to create a world of enormous complexity diversity and beauty.

Evidence of Evolution Sue Middleton, Mary Ellen Hannibal, 2009

The Greatest Show on Earth Richard Dawkins, 2010 In *The Greatest Show on Earth* Richard Dawkins takes on creationists including followers of Intelligent Design and all those who question the fact of evolution through natural selection.

Why Evolution is True Jerry A. Coyne, 2010-01-14 For all the discussion in the media about creationism and Intelligent Design virtually nothing has been said about the evidence in question the evidence for evolution by natural selection. Yet as this succinct and important book shows that evidence is vast varied and magnificent and drawn from many disparate fields of science. The very latest research is uncovering a stream of evidence revealing evolution in action from the actual observation of a species splitting into two to new fossil discoveries to the deciphering of the evidence stored in our genome. *Why Evolution is True* weaves together the many threads of modern work in genetics palaeontology geology molecular biology anatomy and development to demonstrate the indelible stamp of the processes first proposed by Darwin. It is a crisp lucid and accessible statement that will leave no one with an open mind in any doubt about the truth of evolution.

Evolution Michael Carter, 2019 This 80 minute lesson plan covers the evidence for evolution and fossils.

The Greatest Show on Earth Richard Dawkins, 2010-05-04 Richard Dawkins transformed our view of God in his blockbuster *The God Delusion* which sold more than 2 million copies in English alone. He revolutionized the way we see natural selection in the seminal bestseller *The Selfish Gene*. Now he launches a fierce counterattack against proponents of Intelligent Design in his latest New York Times bestseller *The Greatest Show on Earth*. Intelligent Design is being taught in our schools educators are being asked to teach the controversy behind evolutionary theory. There is no controversy. Dawkins sifts through rich layers of scientific evidence from living examples of natural selection to clues in the fossil record from natural clocks that mark the vast epochs wherein evolution ran its course to the intricacies of developing embryos from plate tectonics to molecular genetics to make the airtight case that we find ourselves perched on one tiny twig in the midst of a blossoming and flourishing tree of life and it is no accident but the direct consequence of evolution by non random selection. His unjaded passion for the natural world turns what might have been a negative argument exposing the absurdities of the creationist position into a positive offering to the reader nothing less than a master's vision of life in all its splendor.
