Prato, 2017-11-14 These ethnographically based studies of diverse urban experiences across the world present cutting edge research and stimulate an empirically grounded theoretical reconceptualization The essays identify ethnography as a powerful tool for making sense of life in our rapidly changing complex cities They stress the point that while there is no need to fetishize fieldwork or to view it as an end in itself its unique value cannot be overstated These active engaged researchers have produced essays that avoid abstractions and generalities while engaging with the analytical complexities of ethnographic evidence Together they prove the great value of knowledge produced by long term fieldwork to mainstream academic debates and more broadly to society Research Handbook on Urban Sociology Miguel A. Martínez, 2024-04-12 Emphasising the social critical and situated dimensions of the urban this comprehensive Research Handbook presents a unique collection of theoretical and empirical perspectives on urban sociology Bringing together expert contributors from across the world it provides a rich overview and research agenda for contemporary urban sociological scholarship **Walking** Charlotte Bates, Emma Jackson, 2026-03-17 Going for a walk with twenty sociologists this collection is a playful rendition of the social worlds that we move in and through From city streets to coastlines along riverbanks and through

street markets alone and together each walk blurs descriptive poetic and theoretical observations and insights to reveal the worlds we live in afresh Attending to the politics and poetics of walking and place the collection challenges the taken for granted privileges of mobility highlights the ways in which walking is embodied and situated and shows how social life unfolds in and through spaces Learning on and from the streets tracing footprints and attending to rhythms these walks map sociological thought and carve new paths in the terrain of the sociological imagination

**Globalism and Localization** Jeanine Canty, 2019-05-16 Considering the context of the present ecological and social crisis this book takes an interdisciplinary approach to explore the relationship between globalism and localization Globalism may be viewed as a positive emergent property of globalization The latter depicts a worldwide economic and political system and arguably a worldview that has directly increased planetary levels of injustice poverty militarism violence and ecological destruction In contrast globalism represents interconnected systems of exchange and resourcefulness through increased communications across innumerable global diversities In an economic cultural and political framework localization centers on small scale communities placed

within the immediate bioregion providing intimacy between the means of production and consumption as well as long term security and resilience There is an increasing movement towards localization in order to counteract the destruction wreaked by globalization yet our world is deeply and integrally immersed within a globalized reality Within this collection contributors expound upon the connection between local and global phenomenon within their respective fields including social ecology climate justice ecopsychology big history peace ecology social justice community resilience indigenous rights permaculture food justice liberatory politics and both transformative and transpersonal studies

**Crime Prevention Through Environmental Design** Garland F. White, 2006 This book argues that the level of social and physical capital in communities can influence the amount of crime Communities are conceived as varying across positive weak or negative levels of social and physical capital Negative social and physical capital produce higher levels of disorder and crime Conversely positive social and physical capital enables residents to lower social problems in communities Weak social and physical capital allows

more disorder because the community's defenses against crime and disorder are not strong enough to combat these problems. The general perspectives include broken windows, defensible space, hot spots, collective efficacy, social disorganization, underclass, gang communities, the post-industrialized communities, and routine activities theory. The ameliorative programs include the weed and seed program, the moving to opportunity program, community policing, and empowerment zones.

**Labour History**, 2004. *The Politics of Urban Development* Clarence Nathan Stone, Heywood T. Sanders, 1987. In the past twenty years the study of urban politics has shifted from a predominant concern with political culture and ethos to a preoccupation with political economy, particularly that of urban development. Urban scholars have come to recognize that cities are shaped by forces beyond their boundaries. From that focus have emerged the views that cities are clearly engaged in economic competition, that market processes are shaped by national policy decisions, sometimes intentionally and sometimes inadvertently, and that the costs and benefits of economic growth are unevenly distributed. But what else needs to be said about the policies and politics of urban development? To supplement prevailing theories, *The Politics of Urban Development* argues that the role of local actors in making development decisions merits closer study. Whatever the structural constraints, politics still matters. Collectively, the essays provide ample evidence that local government officials and other community actors do not simply follow the imperatives that derive from the national political economy; they are able to assert a significant degree of influence over the shared destiny of an urban population. The impact of the collection is to heighten awareness of local political practices and of how and why they make a difference.

[The Western Journal of Black Studies](#), 2006. *Class and Everyday Life* Kirsteen Paton, 2023-11-28. Exploring the issues of class through in-depth studies of housing, sport, art, music, and politics in Britain, *Class and Everyday Life* persuasively demonstrates the pervasive influence of class on everyday life and the need to centre a radical understanding of class within emancipatory political movements. The need for a more expansive understanding of class is politically urgent. There is a disconnect between descriptive and analytical approaches to class and the politics of class and realities around how class is lived. Discourse has been shaped by top-down frameworks of analysis and measurements which have stripped the study of class of its political radicalism. This book makes the case for a sociology of class which is informed by a politics of class based upon using the everyday as the point of enquiry. It presents a sociology of class from the bottom up which focuses on everyday life and the point at which class is made and remade. In doing so, it advocates for an attentiveness to class and everyday life through a conjunctural analysis. Using an everyday lens, this book examines how the shifting conjunctures manifest in everyday spaces in classed ways and how such changes are negotiated, resisted, and shape the working class subject and communities. This is based upon an understanding of everyday classed experiences which identifies and challenges inequalities while also recognising value and hope. This perspective aims to offer a recognition of both the opportunities and challenges of class as a way of developing a stronger, more politicised understanding of class which takes solidarity and class community power.

seriously to resist inequality and develop emancipatory politics This urgent and impassioned book will be essential reading for students academics and activists with an interest in the lived experience of class in Britain today
