universities face major challenges in meeting the needs of their students in the area of academic language and literacy The
dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the
national population are native speakers of these languages Nine other languages can be media of instruction in schools
which makes the transition to tertiary education difficult enough in itself for students from these schools The focus of this
book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude
students from higher education but rather to identify those who would benefit from further development of their ability in
order to undertake their degree studies successfully The volume also aims to bring the innovative solutions designed by
South African educators to a wider international audience Mathematics Education Today ,1985 *Army-Navy-Air Force*
