Curriculum Development and Evaluation, 2024-12-30 Much has been written about successful curricula for of the fourth Fifth Industrial Revolution 4 5IR The written work has been dominated by a contestation between content driven approaches professional needs and outcomes driven approaches societal needs The contestation between these approaches misses the production of conclusive curriculum components that underpin a successful digitalised curriculum for of the 4 5IR The contestation further misses a pragmatic curriculum which is capable of addressing individual unique needs As such this book concentrates on curriculum components that underpin a successful digitalised curriculum for of the 4 5IR It further discusses curriculum components for of a pragmatic curriculum that harmonises between the two dominating approaches Contributors are Bongani Boy Dlamini Reuben S Dlamini Terrie Jwan Sella Simon Bhekumuzi Khoza Dumisa C Mabuza Makhulu A Makumane Dumsani W Mncube Cedric Bheki Mpungose Sandile Ngcobo Makhosazana E Shoba and Lerato Hlengiwe Sokhulu

Research for Educational Change Jill Adler, Anna Sfard, 2016-06-17 *Research for Educational Change* presents ways in which educational research can fulfil its commitments to educational practice Focussing its discussion within the context of mathematics education it argues that while research generated insights can have beneficial effects on learning and teaching the question of how these effects are to be generated and sustained is far from evident The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice In the first part of the book four teams of researchers use different methodologies while analysing the same corpus of data collected in a South African

mathematics classroom In the second part each of these teams makes a specific proposal about what can be done and how so that its research generated insights have a tangible beneficial impact on what is happening in mathematical classrooms Combining two discourses that of researchers speaking to one another and that of researchers communicating their insights to those responsible for educational practice the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education educational research and classroom practices This book will be key reading for postgraduates researchers and academics in education and particularly in the areas of mathematics education education research teacher education and classroom practice It will also appeal to teacher educators practitioners and undergraduate students interested in educational research
