To know how humans activities affect the atmosphere

Global Warming

<http://www.epa.gov/climatechange/impacts/adaptation/impacts.html>

Explain the greenhouse effect?

The greenhouse effect is the process by which solar radiation heats the surface of the earth and the atmosphere, and the atmosphere radiates heat back to the earth, warming the surface.

What is global warming?

Global warming is the increase in the average temperature of the earth's atmosphere and the oceans.

What are the two greenhouse gases? Where does each come from?

The two greenhouse gases are carbon dioxide and methane. Carbon dioxide is produced by the burning of fossil fuels, and methane is produced by the decomposition of organic matter.

Explain the environmental impacts potentially faced from global warming.

Global warming may cause a rise in sea level, a decrease in crop yields, a decrease in the number of species, a decrease in the number of people, a decrease in the number of people, a decrease in the number of people, a decrease in the number of people.

Human Population Growth

What is

List the factors that affect population growth.

Population growth is affected by birth rate, death rate, immigration, and emigration. The population of the world is growing rapidly because of the high birth rate and the low death rate.

[Humanity's Footprint](#) Walter K Dodds,2008-01-22 For the first time in history humans have exceeded the sustaining capacity of Earth s global ecosystems Our expanding footprint has tremendous momentum and the insidious explosion of human impact creates a shockwave that threatens ecosystems worldwide for decades possibly centuries Walter K Dodds depicts in clear nontechnical terms the root causes and global

environmental effects of human behavior He describes trends in population growth resource use and global environmental impacts of the past two centuries such as greenhouse effects ozone depletion water pollution and species extinctions and introductions Dodds also addresses less familiar developments such as the spread of antibiotic resistant genes in bacteria and the concentration of pesticides in the Arctic and other remote ecosystems He identifies fundamental human activities that have irreversible effects on the environment and draws on recent social science and game theory results to explain why people use more than their share Past behavior indicates that as resources grow scarce humans will escalate their use of what remains instead of managing their consumption Humanity's Footprint paints a lively but ultimately sobering picture of our environmental predicament Dodds calls for a consistent approach to socioenvironmental restoration that draws on new thinking from across disciplines to develop sustainable solutions to global environmental problems
