Bergami,Robert Ptacnik,2023-11-13 Conserving and restoring freshwater and marine ecosystems are priorities addressed by  
several European and global conservation initiatives Many management and conservation initiatives have been put in place  
to support the achievement of declared national and global conservation and sustainability goals Nonetheless the extent to  
which all these initiatives can provide lasting positive effects on conservation and restoration targets is often impaired  
limited by the lack of robust baseline data and systematic monitoring which in turn are constrained by the limited number of  
long term monitoring programs and limited dedicated funding This collection underlines the importance of monitoring in  
times of global change and shifting baselines and the urgency of boosting conservation strategies to ensure progression  
towards meeting global conservation objectives Emphasis is given also to the socio ecological contexts and dimensions of  
conservation efforts and the potential of societal engagement in monitoring practices a key enabling factor to turn  
conservation initiatives into practical actions and ecosystem protection    MTR; Music Trades Review ,1880    **Cage Birds**
