[Making the Modern World](#) Vaclav Smil,2013-12-16 How much further should the affluent world push its material consumption Does relative dematerialization lead to absolute decline in demand for materials These and many other questions are discussed and answered in Making the Modern World Materials and Dematerialization Over the course of time the modern world has become dependent on unprecedented flows of materials Now even the most efficient production processes and the highest practical rates of recycling may not be enough to result in dematerialization rates that would be high enough to negate the rising demand for materials generated by continuing population growth and rising standards of living This book explores the costs of this dependence and the potential for substantial dematerialization of modern economies Making the Modern World Materials

and Dematerialization considers the principal materials used throughout history from wood and stone through to metals alloys plastics and silicon describing their extraction and production as well as their dominant applications The evolving productivities of material extraction processing synthesis finishing and distribution and the energy costs and environmental impact of rising material consumption are examined in detail The book concludes with an outlook for the future discussing the prospects for dematerialization and potential constraints on materials This interdisciplinary text provides useful perspectives for readers with backgrounds including resource economics environmental studies energy analysis mineral geology industrial organization manufacturing and material science

The World in a Grain Vince Beiser, 2018-08-07 A finalist for the PEN E O Wilson Literary Science Writing Award The gripping story of the most important overlooked commodity in the world sand and the crucial role it plays in our lives After water and air sand is the natural resource that we consume more than any other even more than oil Every concrete building and paved road on Earth every computer screen and silicon chip is made from sand From Egypt's pyramids to the Hubble telescope from the world's tallest skyscraper to the sidewalk below it from Chartres stained glass windows to your iPhone sand shelters us empowers us engages us and inspires us It's the ingredient that makes possible our cities our science our lives and our future And incredibly we're running out of it The World in a Grain is the compelling true story of the hugely important and diminishing natural resource that grows more essential every day and of the people who mine it sell it build with it and sometimes even kill for it It's also a provocative examination of the serious human and environmental costs incurred by our dependence on sand which has received little public attention Not all sand is created equal Some of the easiest sand to get to is the least useful Award winning journalist Vince Beiser delves deep into this world taking readers on a journey across the globe from the United States to remote corners of India China and Dubai to explain why sand is so crucial to modern life Along the way readers encounter world changing innovators island building entrepreneurs desert fighters and murderous sand pirates The result is an entertaining and eye opening work one that is both unexpected and involving rippling with fascinating detail and filled with surprising characters

Westlessness Samir Puri, 2024-07-25 What if the sun truly is setting on the Western world's outsized influence over the rest of the planet In Westlessness former UK diplomat Dr Samir Puri vividly demonstrates how in demographic economic military and cultural terms we are hurtling into a far more diverse global future Many of our certainties about the present built on centuries of massive Western global impact are increasingly fragile Untold wealth is moving from the West to the East as nations like India and Indonesia are set to reach new heights of growth and confidence And China continues its ascent to the peak of the economic mountain but are cracks appearing And will the Western world under the aegis of US global military economic technological and cultural power give up its privileged position willingly Nothing is linear and nothing is predictable Are we prepared personally and professionally for a far more diverse global future Prepared or unprepared Westlessness is essential reading for us all

Adopting the Tune of Term: An Psychological Symphony within **Making Modern World Materials Dematerialization**

In some sort of consumed by displays and the ceaseless chatter of fast connection, the melodic elegance and emotional symphony produced by the prepared word frequently diminish in to the back ground, eclipsed by the persistent sound and distractions that permeate our lives. However, nestled within the pages of **Making Modern World Materials Dematerialization** a charming fictional value overflowing with organic feelings, lies an immersive symphony waiting to be embraced. Crafted by a wonderful composer of language, that charming masterpiece conducts visitors on a psychological trip, well unraveling the concealed melodies and profound influence resonating within each cautiously crafted phrase. Within the depths of the poignant evaluation, we will explore the book is key harmonies, analyze their enthralling publishing type, and submit ourselves to the profound resonance that echoes in the depths of readers souls.
