MIS Cases M. Lisa Miller, 2005. Appropriate for any course introducing management information systems from a business perspective. This casebook will serve as an ideal complement to most MIS/CIS textbooks. Designed to demonstrate how software can support managerial decision making activities, this casebook features 24 cases more than another casebook currently on the market covering a wide range of functional areas throughout the business including finance, accounting, HR, production and information systems. The cases are spread across three difficulty levels: basic, intermediate and advanced. They present common managerial issues and problems and encourage students to actually use their models to make decisions for the cases characters. They require students to apply spreadsheet, database, Web page development and or presentation graphics software often in an integrated manner. Many of the cases require students to prepare both written and oral presentations on their solutions. Among the topics covered in MIS Cases: Decision Making with Application Software, Second Edition: forecasting, inventory decisions, what if analyses, pricing strategies, billing decisions and much more. Free and Open Source Enterprise Resource Planning: Systems and Strategies Atem de Carvalho, Rogerio, 2011-12-31. Free Open Source Enterprise Resource Planning systems (FOS ERP) are gaining popularity and acceptance due to two main factors: their lack of licensing fees and customizability. Given this organizations are able to easily adopt and manipulate these systems to meet their individual needs. Free and Open Source Enterprise Resource Planning Systems and Strategies unites research on FOS ERP comparing differences with proprietary Enterprise Resource Planning products and demonstrating key research factors. It includes cases demonstrating how small enterprises have benefited from FOS ERP in Spain and in Belgium along with difficulties encountered and solutions developed. This essential reference addresses key issues such as security and legal risks as well as challenges, opportunities and barriers to adoption. *Strategic Management of Services in the Arab Gulf States* M.
