

Flat Towing With Your FCCC Chassis

At Freightliner Custom Chassis, we understand there is a lot of information floating around the internet about flat towing a car with your motorhome. We put together the following to help simplify terminology, help owners of coaches powered by FCCC chassis find clarity in their towing calculations, and ultimately build their confidence when towing with their coach. We hope you'll find it helpful.

Towing Capacity Calculation

$$\text{GCWR (lbs)} - \text{Total Weight of Coach (lbs)} = \text{Tow Capacity}$$

Safety Check: Confirm tow capacity is less than or equal to Tow Hitch Rating.

Important Flat Towing Terms

Before we calculate your towing capacity, let's quickly define a few terms we'll be using.

Flat Towing

Towing a vehicle with all four wheels on the ground. The most common tow solution is flat towing. Flat towing is towing a vehicle with all four tires positioned on the ground, rather than elevating the front two wheels on a tow dolly or pulling a car on a trailer. When flat towing, a tow bar connects to the front of the tow vehicle and is pulled behind the RV.

GVWR (Gross Vehicle Weight Rating)

This is the maximum loaded weight under which a vehicle can safely operate when weighing your coach with passengers, fuel and fluids, optional accessories and equipment, cargo, and the "tongue weight" of a tow trailer. This maximum weight is set by the manufacturer.

Actual Weight (Travel Weight)

The total weight of your loaded coach, including passengers, fuel and fluids, optional accessories and equipment, and cargo.

GAWR (Gross Axle Weight Rating)

This is the maximum allowable weight for one axle of your coach. Each axle on your coach has its own GAWR, and this weight must not be exceeded when you load your coach, or it will be considered unsafe.

GCWR (Gross Combination Weight Rating)

This is the total potential weight rating for a fully loaded coach combined with the weight of the tow vehicle.

Tow Hitch Rating

The tow hitch manufacturer's weight rating for the tow bar hitch itself. This is the maximum amount the coach could tow, if the calculated towing capacity is available. This rating is for the tow bar only and does not take into account actual GCWR, so it may not be an accurate representation of how much your specific coach can tow.

OEM - Original Equipment Manufacturer.
