

Human Reproduction

The male sex cell is called a sperm cell. Its structure is specifically adapted to carry out its function.

1. Complete the table to describe the structure and function of each of the parts.

tail	
midpiece	
head	

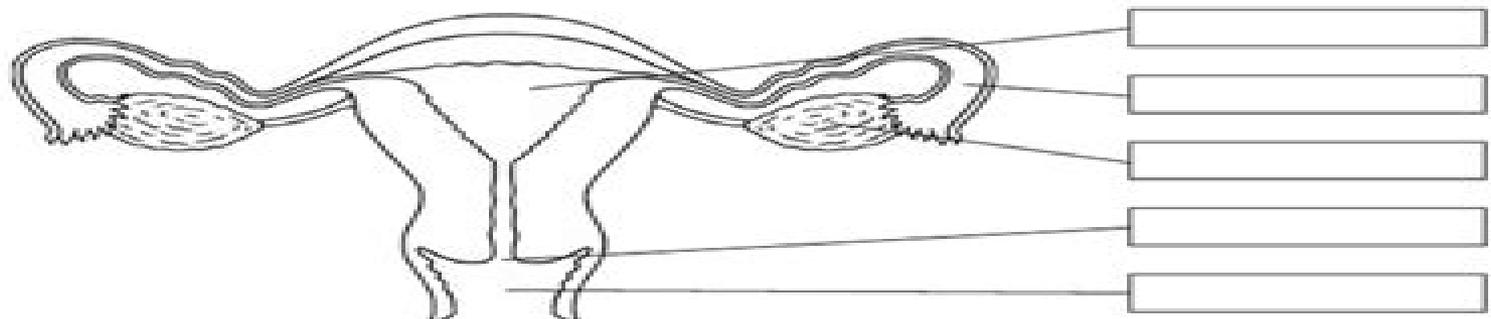

2. Label the parts of the sperm cell.

Humans are mammals. All mammals reproduce in a similar way; fertilisation occurs within the body. Sperm is ejaculated from the male into the female and travels to find the egg cell. The sperm and egg cell fuse together in a process called fertilisation. The fertilised egg cell develops into an embryo, which is carried inside the uterus (womb) of the female until birth.

3. Label the organs of the female reproductive system. Use words from the box below.

cervix	ovary	oviduct	uterus	vagina
--------	-------	---------	--------	--------
