*The Use of Nano Composites in Automotive Applications* Y Charles Lu,Srikanth Pilla,2015-12-18 With their high specific strength and stiffness composites have the potential to significantly lower the vehicle weight which can have a dramatic effect on improving fuel efficiency and reducing greenhouse gas emissions For the past decade or so composites have been experiencing several transitions including the transition from micro scale reinforcement fillers to nano scale reinforcement fillers resulting in the nanocomposite The effectiveness of the nano sized fillers in composites can be explained by one of their unique geometric properties the length to thickness aspect ratio Therefore nano sized fillers have exceptionally higher reinforcing efficiency than the conventional large fillers The effectiveness of the nano sized fillers in composites is also due to their large surface area and surface energy This book consists of a collection of technical papers selected from the automotive composites and other relevant sessions that the editors have organized for the SAE World Congress over the past decade It begins with a section on the perspectives of nanocomposites in the automotive industry with of three excellent papers given by experts from the industry and academia Following it brings to the reader in depth information on the three major nanocomposites categories o Nano fiber reinforced composites o Nano platelet reinforced composites o Nano particle reinforced composites **Engineering Against Fracture** S. G. Pantelakis,C. A. Rodopoulos,2009-02-14 Within the last thirty years there is a growing acknowledgement that prevention of catastrophic failures necessitates engagement of a large pool of expertise Herein it is not excessive to seek advice from disciplines like materials science structural engineering mathematics physics reliability engineering and even economics Today s engineering goals independently of size do not have the luxury of being outsideaglobalperspective Survivaloftheintegratedmarketsand nancialsystems require a web of safe transportation energy production and product manufacturing It is perhaps the rst decade in engineering history that multidisciplinary proaching is not just an idea that needs to materialise but has matured beyond infancy We can witness such

transition by examining engineering job descriptions and postgraduate curricula The undertaking of organising a conference to reflect the above was not easy and definitely not something that was brought to life without a lot of work and commitment The 1 Conference of Engineering Against Fracture from its conceptual day until completion was designed in a way of underlying the need of bringing all the key players on a common ground that once properly cultivated can flourish To achieve that the conference themes were numerous and despite their in principle notional differences it was apparent that the attendees established such common ground through argumentation The reader can see this from the variety of research areas reflected by the works and keynote lecturers presented
