Hygienically Relevant Biofilms:

Hygienically Relevant Biofilms Rok Fink, 2015 This book describes biofilms in the context of hygiene in food safety and hospital facilities starting with bacterial adhesion as an initial step of cell colonization followed by the growth and maturation of biofilms The main focus of this book is on biofilm prevention and control The resistance of bacteria to several antibiotics is a global public health problem not limited to hospital facilities but also to other sectors including the food industry This raises questions about whether effective cleaning and disinfection reduce the risk of food borne and hospital acquired illness Can the surface characteristics be treated to prevent bacterial adhesion and consequently the formation of biofilms Biofilms are complex communities of bacteria attached the surfaces with fully developed architecture and highly organized interactions A better understanding of the biofilm lifecycle with advanced strategies of physical chemical and biological actions would reduce the risk of infection The question is not whether the preventive and control measures will play a significant role in public health but rather what the implications of their use will be for hygiene in the food industry and hospital facilities

Biofilm Highlights Hans-Curt Flemming, Jost Wingender, Ulrich Szewzyk, 2011-08-02 Living in biofilms is the common way of life of microorganisms transiently immobilized in their matrix of extracellular polymeric substances EPS interacting in many ways and using the matrix as an external digestion and protection system This is how they have organized their life in the environment in the medical context and in technical systems and has helped make them the oldest most successful and ubiquitous form of life In this book hot spots in current biofilm research are presented in critical and sometimes provocative chapters This serves a twofold purpose to provide an overview and to inspire further discussions Above all the book seeks to stimulate lateral thinking
