

THE DIFFERENCE BETWEEN A FUSE BOX & ELECTRICAL PANEL

The biggest difference between a fuse box and an electrical panel is that fuse boxes use fuses and electrical panels use circuit breakers. Both do essentially the same job but circuit breakers do it much better. Fuse boxes are an outdated technology primarily found in older homes.

The average fuse box is rated for 60 amps. But circuit breakers are generally between 150 to 200 amps.

FUSE BOX

Fuses contain a metal filament that overheats and melts when excess power surges through it. Once a fuse trips, it must be discarded and replaced with a new fuse.

Fuses are single use only.

CIRCUIT BREAKERS

Circuit breakers contain a mechanical switch that flips to the OFF position when excess power surges through the breaker. To reset the breaker simply push the handle to the ON position.

Circuit breakers can be used again and again without replacement.
