

Safe Manual Handling

INTRODUCTION

LEGISLATION

From 2001, a UK government report on the health and safety of those who work in the warehouse industry has led to new regulations on safety in the workplace. These are known as the Manual Handling Operations Regulations 1992 (MHSR) and the Lifting and Lowering Operations Regulations 1999 (LLOREG). The MHSR is designed to help reduce the number of workplace accidents from manual handling.

TYPES OF INJURY

The back is a series of bones with a thin, fibrous outer covering. These are ligaments and muscles, which support the spine. There is a small amount of flexibility to each part, which allows them to bend.

RISK ASSESSMENT

The assessment should be written down and the recommendations used upon other handling procedures.

TASK

The whole task should be looked at from the beginning to the end. Some of these aspects need to be considered:

- Is it necessary?
- Can it be done in one of the ways?
- Can it be done in a way that is less likely to cause an accident?
- Can lifting or pushing be avoided by the use of a trolley?
- Can the weight be reduced or the number of lifts reduced?
- Can the weight be reduced by using the right side of the body, or using a pallet?
- Can the assessment be used as a guide for other similar tasks?

INDIVIDUAL

- Is the worker fit and fit enough to carry out the task?
- Does it require special training?
- Has the worker been trained in the correct way to lift and lower the load? Do they know in what way to lift and lower the load?
