scientific foundations of psychology

10-14%

Psychology is the scientific study of behavior and mental processes. This unit examined the history of psychology, psychological theories, contemporary perspectives on psychology, and how psychological research is conducted. As scientists, psychologists collect data and make observations about the ways in which humans and animals behave and think in order to understand behavior and mental processes. Psychologists use a variety of research methods and designs to conduct their research. These tools help them develop psychological theories about behavior and mental processes. To ensure that their results are valid and reliable, psychologists' research must adhere to strict ethical and procedural guidelines.
