Redesigning Manufacturing M. Beverland, B. Nielsen, V. Pryce, Ellen Hellmann, 2015-05-13 Manufacturing in the UK has an image problem Although this image problem is more fiction than fact it nonetheless has an impact on the sector s ability to attract staff capital and policy interest This book redresses this situation by focusing on the real successes of the sector and the strategies used by makers to achieve sustainable results

Mining in Latin America Kalowatie Deonandan, Michael L. Dougherty, 2016-07-15 The last two decades have witnessed a dramatic expansion and intensification of mineral resource exploitation and development across the global south especially in Latin America This shift has brought mining more visibly into global public debates and spurred a great deal of controversy and conflict This volume assembles new scholarship that provides critical perspectives on these issues The book marshals original empirical work from leading social scientists in a variety of disciplines to address a range of questions about the practices of mining companies on the

ground the impacts of mining on host communities and the responses to mining from communities civil society and states The book further explores the global and international causes consequences and innovations of this new era of mining activity in Latin America Key issues include the role of Canadian mining companies and their investment in the region and to a lesser extent the role of Chinese mining capital Several chapters take a regional perspective while others are based on empirical data from specific countries including Bolivia Brazil El Salvador Guatemala and Peru

Reproductive Racism Susanne Schultz, 2023-07-04 Population is a dangerous political category It is not separable from the racist and class based valorisation and devaluation of different lives From global contraceptive implant programmes to right wing anti immigration discourses demographic interpretations of multiple current crises legitimise the states grip on childbearing and mobility The results are complex dimensions of reproductive racism and restrictive border regimes Meanwhile global social inequalities and racial capitalist extractivism stay out of the game The book analyses how demographic knowledge production and states grip to the variable of population intertwine It introduces the concept of the Malthusian matrix in order to understand how class selective and racist hierarchies within population narratives are combined with gendered policies of reproductive bodies and behaviours Several chapters explore current reproductive racism establishing a hierarchy between the birth of desirable and undesirable people An upward redistributive family policy in Germany is promoting births within the privileged middle classes And international population programs revive targets in order to increase the use of long acting contraceptives in the Global South within a market oriented setting of Big Pharma promotion Reproductive racism is also effective in migration policy strategies narratives about migrant birth rates circulate among ultra right forces as well as seemingly apolitical demographic policy consultancy The last sections discuss state theoretical approaches and the intersectional feminist concept of reproductive justice in order to provide tools for critique and resistance

Global Governance of Civil Aviation Safety Nilgun Ozgur, 2022-09-30 This book indicates the shortcomings of the current international legal system and customary international norms that govern international aviation law to comply with contemporary air transport market realities As the air transport market develops globally the safety regime of civil aviation should also be governed and applied globally In this book the author departs from current international legal norms to examine the emerging legal field of global administrative law Through that lens the possibility of reconstructing the set of legal mechanisms that govern domestic and international administrative interaction in the global field of aviation safety is explored This book demonstrates that a legal system is never complete but always develops in tandem with changing needs i e the participation of the affected parties Exploring the principles of GAL theory contributes to addressing the contemporary legal issues relating to state compliance with international aviation safety standards that would otherwise not be covered by customary international law In particular the principles of GAL theory regarding global governance and the public character of global regulations the role of individuals and states in global governance and state sovereignty are considered valuable

contributions to contemporary global aviation safety issues in practice It is asserted in this book that proper checks and balances in global aviation safety can be improved by making these accessible to individuals by way of national courts Finally establishing public awareness of global aviation safety standards will eventually create greater pressure on states to implement and enforce them This book is in an area increasing academic and research interest of practitioners of public international aviation law global administrative law global governance and global aviation safety global air transport market regulations
