Economic crises in history teaching Council of Europe,2025-10-01 How can history education equip students to understand and confront the economic crises of yesterday and tomorrow Since the beginning of the 21st century the economic consequences of the debt crises of 2007 and 2008 of the Covid 19 pandemic and of Russia's war of aggression against Ukraine have continuously challenged the livelihood of many families in Europe and around the world Understanding economic crises from a historical perspective enables students to better respond to present and future experiences of such crises The mission of the Observatory on History Teaching in Europe OHTE is to provide a clear picture of the state of history teaching in its member states This is done through OHTE general reports on the state of history teaching in Europe and OHTE thematic reports which explore particular areas of interest and how they are treated in history lessons The second thematic report of the OHTE investigates the extent and the ways in which learners are being prepared to understand and cope with such crises through history education in the public schooling systems of OHTE's 17 member states It combines curriculum and textbook analysis with an explorative study of teachers' experiences and summarises its most significant conclusions into 10 key findings listed in the introductory chapter *(Re)Constructing Memory: Education, Identity, and Conflict* Michelle J. Bellino,James H. Williams,2017-02-08 How do schools protect young people and call on the youngest citizens to respond to violent conflict and division operating outside and sometimes within school walls What kinds of curricular representations of conflict contribute to the construction of national identity and what kinds of encounters challenge presumed boundaries between us and them Through contemporary and historical case studies drawn from Cambodia Egypt Northern Ireland Peru and Rwanda among others this collection explores how societies experiencing armed conflict and its aftermath imagine education as a space for forging collective identity peace and stability and national citizenship In some contexts the erasure of conflict and the homogenization of difference are central to shaping national identities and attitudes In other cases collective memory of conflict functions as a central organizing frame through which citizenship and national identity are re-constructed with embedded messages about who belongs and how social belonging is achieved The essays in this volume illuminate varied and complex inter-relationships between education conflict and national identity while accounting for ways in which policymakers teachers youth and community members replicate resist and transform conflict through everyday interactions in educational spaces *Education Reform and Internationalisation* David Bridges,2014-08-28 This collection presents new investigations into the role of heritage languages and the correlation between culture and language from a pedagogic and cosmopolitical point of view **Cartography - Maps Connecting the World** Claudia Robbi Sluter,Carla Bernadete Madureira Cruz,Paulo Márcio Leal de Menezes,2015-07-10 This book is an important volume in the series on the state of art research in Cartography and GI Science It is a collection of selected peer reviewed papers organized into contemporary topics of research presented at the 27th International Cartographic

Sustaining Employment and Wage Gains in Brazil Joana Silva, Rita Almeida, Victoria Strokova, 2015-08-26 In the past 15 years employment labor market participation and wages have grown significantly in Brazil Improved labor market outcomes have been the main drivers of reductions in poverty and inequality *Sustaining Employment and Wage Gains in Brazil* A Skills and Jobs Agenda analyzes Brazil's labor markets and identifies the key challenges involved in sustaining job creation wage growth and poverty reduction The work finds that continued progress in employment and labor earnings will depend on the country's ability to achieve a first critical goal raise labor productivity Continued improvements in the livelihoods of the poor will depend on achieving a second critical goal connecting the poor to better more productive jobs In light of these goals the report discusses reforms of program design and implementation in the following policy areas a skills development including through the flagship training program PRONATEC b unemployment insurance and other labor market regulations c active labor market programs including the National Employment System and entrepreneurship support and d productive inclusion programs that by promoting employability or income earning opportunities for the poorest segments of the population in new ways can help connect the poor to better more productive jobs The report reviews existing interventions in these four policy

areas and proposes an agenda of incremental policy changes that could more effectively support the two critical goals It also illustrates how other countries have dealt with similar challenges As the report emphasizes an essential first step will be to strengthen monitoring and evaluation systems to measure results by tracking programs effects on labor market outcomes and using that information to inform program expansion It also describes specific opportunities in each policy area to better coordinate programs with private sector demands and across policies while also adapting them to improve the results for the urban and rural poor
