Origination Andy Pike,2015-03-24 Origination The Geographies of Brands and Branding offers innovative theoretical and conceptual frameworks relating to the ways that actors create meaning and value in commodity brands and branding through processes of geographical association Provides innovative conceptualization and theorization to facilitate an understanding of the geographical dimensions of brands and branding Challenges current interpretations of brands as vehicles of homogenization in globalization Establishes the theoretical and conceptual foundations of a more geographically sensitive approach through rigorous empirical examination of the under researched geographical differentiation of commodity brands and branding Presents innovative new research and analysis of the socio spatial biographies of the Newcastle Brown Ale Burberry and Apple brands Forges strong new connections between political and cultural economy approaches within geography Provides a distinctive and incisive conceptual and theoretical framework capable of engaging other branded commodities and their branding in other times and places

Towards Good Order at Sea Thomas Mandrup,Francois Vre~,2015-03-01 The problems originating from the resultant bad order at sea can be directly felt on land when smuggling terrorism and related criminal activities operate more or less unhindered The book provides an important mapping of the challenges preventing good order at sea off the African coast and East Africa in particular Rear Admiral N Wang Commandant Royal Danish Defence College

Neighbourhood Perceptions of the Ukraine Crisis Gerhard Besier,Katarzyna Stoklosa,2016-11-03 Recent events in Ukraine and Russia and the subsequent incorporation of Crimea into the Russian state with the support of some circles of inhabitants of the peninsula have shown that the desire of people to belong to the Western part of Europe should not automatically be assumed Discussing different perceptions of the Ukrainian Russian war in neighbouring countries this book offers an analysis of the conflicts and issues connected with the shifting of the border regions of Russia and Ukraine to show how material and psychological borders are never completely stable ideas The contributors historians sociologists anthropologists and political scientists from across Europe use an interdisciplinary and comparative approach to explore the different national and transnational perceptions of a possible future role for Russia

Routledge Handbook of National and Regional Ocean Policies Biliana Cicin-Sain,David Vanderzwaag,Miriam C. Balgos,2015-05-15 This comprehensive handbook prepared by leading ocean policy academics and practitioners from around the world presents in depth analyses of the experiences of fifteen developed and developing nations and four key regions of the world that have taken concrete steps toward cross cutting and integrated national and

regional ocean policy All chapters follow a common framework for policy analysis While most coastal nations of the world already have a variety of sectoral policies in place to manage different uses of the ocean such as shipping fishing oil and gas development in the last two decades the coastal nations covered in the book have undertaken concerted efforts to articulate and implement an integrated ecosystem based vision for the governance of ocean areas under their jurisdiction This includes goals and procedures to harmonize existing uses and laws to foster sustainable development of ocean areas to protect biodiversity and vulnerable resources and ecosystems and to coordinate the actions of the many government agencies that are typically involved in oceans affairs The book highlights the serious conflicts of use in most national ocean zones and the varying attempts by nations to follow the prescriptions emanating from the 1982 UN Law of the Sea Convention and the outcomes of the 1992 2002 and 2012 sustainable development summits The interrelationship among uses and processes in the coast and ocean requires that ocean governance be integrated precautionary and anticipatory Overall the book provides a definitive state of the art review and analysis of national and regional ocean policies around the world *White Paper on Science and Technology*, 2015 **Research Report** University of Ghana, 2014 **The Asia-Pacific Trade Agreement** Joong-Wan Cho, Rajan Sudesh Ratna, 2016 International trade and investment have enabled many countries in the Asia Pacific region to boost economic growth and have lifted millions out of poverty As the Asia Pacific region continues to thrive economically trade and investment barriers are being dissolved and eliminated As countries begin to depend on each other more trade policy is gradually becoming a useful measure to achieve inclusive and sustainable development Trade and investment are linked to the environment and social issues hence their impacts are also multi dimensional It has now been recognized that sustainable production and consumption are essential for sustainable development Countries realize that they are not able to approach global and regional problems on their own and require cooperation both at the level of government and business As a result the region has been active in concluding regional cooperation frameworks which routinely are centered on trade and investment In the meantime business has forged regional integration through the formation of regional value chains and production networks while governments have paved the way for the expansion of such production networks through the formation of regional trade agreements and economic partnerships Thus the Asia Pacific Trade Agreement APTA which is the oldest preferential trade agreement in the region with a large consumer base can play an important role in filling this gap Given a slow progress in the multilateral negotiations in the WTO especially when the members have started questioning the utility of the negotiations after 15 years and a lack of consensus on how to move forward the regional trade agreements can play a vital role Even if they pose a challenge to the multilateralism selected liberalisation of trade and economy in present time can become a building block for future multilateral negotiations One of the reasons for the surge in these preferential trade agreements is to make binding commitments on WTO plus and WTO beyond issues While there are many agreements that exist in Asia and the Pacific there is no such attempt to consolidate

them in one umbrella framework Understanding the benefits of the consolidation one such initiative was started by ESCAP a few years back The RECI initiate for market integration could well be facilitated by APTA however it cannot deliver unless it transforms itself in a new generation agreement Regional integration and cooperation are also important to meet the 2030 agenda for sustainable development Instead of wasting resources in discussing a new institutional framework it would be more effective to use the existing framework and for the Asia Pacific economies the APTA provides an existing institutional platform The cases discussed in this book prepare a ground for the future and it is expected that all the stakeholders member States of ESCAP private sector as well as researchers would benefit from this publication on APTA South South Regional Integration and Sustainable Development *Engineering and Mining Journal* ,1906 *South Dakota History* ,2013
