Geography Paper November 2012 Memorandum:

Decolonization and Conflict Martin Thomas, Gareth Curless, 2017-06-15 Insurgency based irregular warfare typifies armed conflict in the post Cold War age For some years now western and other governments have struggled to contend with ideologically driven guerrilla movements religiously inspired militias and systematic targeting of civilian populations Numerous conflicts of this type are rooted in experiences of empire breakdown Yet few multi empire studies of decolonisation s violence exist *Decolonization and Conflict* brings together expertise on a variety of different cases to offer new perspectives on the colonial conflicts that engulfed Europe s empires after 1945 The contributors analyse multiple forms of colonial counter insurgency from the military engagement of anti colonial movements to the forced removal of civilian populations and the application of new doctrines of psychological warfare Contributors to the collection also show how insurgencies their propoganda and methods of action were inherently transnational and inter connected The resulting study is a vital contribution to our understanding of contested decolonization It emphasises the global connections at work and reveals the contemporary resonances of both anti colonial insurgencies and the means devised to counter them It is essential reading for students and scholars of empire decolonization and asymmetric warfare *America's Moment Rework* America, 2015-06-15 It is time for a new conversation Amid the biggest economic transformation in a century the challenge of our time is to make sure that all Americans benefit from the wave of digital revolutions around the world that have permeated and upended modern life Yet today s economic arguments seem stuck We need a new vision of a hopeful future and a new action agenda So many Americans are uncertain about the future How can there be so many paths to opportunity with so few people traveling them As a nation we have to understand what is required to help Americans succeed now and how to prepare our country for what comes next We have been here before A hundred years ago America experienced the greatest economic transformation and technological revolution in its history The transformation of the past twenty years as the world has moved through the information era into the digital age has turned our life and work upside down once again It is a time of tremendous change but also of tremendous possibility *Rework America* is a group of American leaders who know from experience the challenges we face and the potential solutions In *America s Moment* they suggest a practical agenda for an exciting future It is illustrated by people who are already showing the way and includes actions Americans can take today in their own communities preparing people to succeed using the reach of the Internet and data to innovate jobs and to reach new markets all over the world using technology to match employers and workers and transitioning to a no collar working world neither blue collar nor white collar Set against the history of how Americans succeeded once before in remaking their country *America s Moment* is about the future It describes how the same forces of change technology and a networked world can become tools that can open opportunity to everyone *Sustainable Railway Futures* Becky P.Y. Loo, Claude Comtois, 2016-03-03 Revitalizing railways as a major sustainable transport mode in modern societies faces many issues and

challenges This in depth overview places the importance of railways in the wider context of comprehensive sustainability which encompasses sustainable development social and economic equity and community livability Some scholars have described the 21st century as a period of renaissance for railways and suggest this transport mode can fulfil people s desire for high mobility with low negative environmental social economic and financial impacts In light of these new expectations for railways in both passenger and freight transport worldwide this book offers the latest research insights on the renewed interest about railway expansions and their wide ranging environmental socio economic and even political implications

Dictators Without Borders Alexander A. Cooley,John Heathershaw,2017-02-07 A penetrating look into the unrecognized and unregulated links between autocratic regimes in Central Asia and centers of power and wealth throughout the West Weak corrupt and politically unstable the former Soviet republics of Kazakhstan Kyrgyzstan Tajikistan and Uzbekistan are dismissed as isolated and irrelevant to the outside world But are they This hard hitting book argues that Central Asia is in reality a globalization leader with extensive involvement in economics politics and security dynamics beyond its borders Yet Central Asia s international activities are mostly hidden from view with disturbing implications for world security Based on years of research and involvement in the region Alexander Cooley and John Heathershaw reveal how business networks elite bank accounts overseas courts third party brokers and Western lawyers connect Central Asia s supposedly isolated leaders with global power centers The authors also uncover widespread Western participation in money laundering bribery foreign lobbying by autocratic governments and the exploiting of legal loopholes within Central Asia Riveting and important this book exposes the global connections of a troubled region that must no longer be ignored *The Middle and Upper Paleolithic Archeology of the Levant and Beyond* Yoshihiro Nishiaki,Takeru Akazawa,2017-12-06 This volume is a compilation of results from sessions of the Second International Conference on the Replacement of Neanderthals by Modern Humans which took place between November 30 and December 6 2014 in Hokkaido Japan Similar to the first conference held in 2012 in Tokyo the 2014 conference RNMH2014 aimed to compile the results of the latest multidisciplinary approaches investigating the issues surrounding the replacement of Neanderthals by modern humans The results of the sessions supplemented by off site contributions center on the archeology of the Middle and Upper Paleolithic of the Levant and beyond The first part of this volume presents recent findings from the Levant while the second part focuses on the neighboring regions namely the Caucasus the Zagros and South Asia The 13 chapters in this volume highlight the distinct nature of the cultural occurrences during the Middle and Upper Paleolithic periods of the Levant displaying a continuous development as well as a combination of lithic traditions that may have originated in different regions This syncretism which is an unusual occurrence in the regions discussed in this volume reinforces the importance of the Levant as a region for interpreting the RNMH phenomenon in West Asia Defence Planning and Uncertainty Stephan Frühling,2014-04-24 How can countries decide what kind of military forces they need if threats are uncertain and history is full of strategic surprises

This is a question that is more pertinent than ever as countries across the Asia Pacific are faced with the military and economic rise of China. Uncertainty is inherent in defence planning but different types of uncertainty mean that countries need to approach decisions about military force structure in different ways. This book examines four different basic frameworks for defence planning and demonstrates how states can make decisions coherently about the structure and posture of their defence forces despite strategic uncertainty. It draws on case studies from the United States, Australian and New Zealand, each of which developed key concepts for their particular circumstances and risk perception in Asia. Success as well as failure in developing coherent defence planning frameworks holds lessons for the United States and other countries as they consider how best to structure their military forces for the uncertain challenges of the future.
