Geography Paper September 2013:

TouchIT Alan Dix, Steve Gill, Devina Ramduny-Ellis, Jo Hare, 2022-07-28 Digital technology is fundamentally altering the world we live in but can only be truly understood in relation to the physical world we all inhabit The most successful future products and policies will be those that take this rich digital physical ecology seriously The physical world is increasingly filled with digital products to the extent that the boundaries of digital and physical reality become blurred From mundane devices such as mobile phones and washing machines to esoteric research including tangible computation and body implants we continually bridge two worlds literally touching buttons and dials and simultaneously interacting with the digital systems that lie behind them The connection between pure thought and abstract information is through solid keyboard and mouse but likewise the material world of buildings cars and running shoes is suffused with computation through sensors displays and flashing LEDs How do people understand this world and how can designers create usable hybrid physical digital products TouchIT brings together insights from human computer interaction and industrial design exploring these themes under four main headings human body and mind objects and things space and information and computation In considering each the authors look into the underlying physical processes our human understanding of them and then the way these inform and are informed by digital design The end draws together the theoretical and practical implications of this for design including practical advice potential tools and philosophical underpinnings

The Chinese Constitution of Central Asia

N. Godehardt, 2014-03-21 China's commitments in Central Asia illustrate how regional foreign policy works and how long standing principles of Chinese foreign policy might be revised in the near future China's rise has moved Asia which is why it seems that what we have traditionally regarded as the geographic and political scope of Asia might actually considerably change in the near future Nadine Godehardt gives crucial insights into the Chinese expert discourse on Central Asia analyzing how Chinese experts define Central Asia when they talk and write about policy issues related to China's immediate Western neighbourhood In this context she gives an inside perspective on Chinese voices whose meanings are rarely examined in Chinese International Relations studies

Polar Geopolitics?

The Data Revolution Rob Kitchin, 2014-09-16 Carefully distinguishing between big data and open data and exploring various data infrastructures Kitchin vividly illustrates how the data landscape is rapidly changing and calls for a revolution in how we think about data Evelyn Ruppert Goldsmiths University of London Deconstructs the hype around the data revolution to carefully guide us through the histories and the futures of big data The book skilfully engages with debates from across the humanities social sciences and sciences in order to produce a critical account of how data are enmeshed into enormous social economic and political changes that are taking place Mark Graham University of Oxford Traditionally data has been a

scarce commodity which given its value has been either jealously guarded or expensively traded In recent years technological developments and political lobbying have turned this position on its head Data now flow as a deep and wide torrent are low in cost and supported by robust infrastructures and are increasingly open and accessible A data revolution is underway one that is already reshaping how knowledge is produced business conducted and governance enacted as well as raising many questions concerning surveillance privacy security profiling social sorting and intellectual property rights In contrast to the hype and hubris of much media and business coverage The Data Revolution provides a synoptic and critical analysis of the emerging data landscape Accessible in style the book provides A synoptic overview of big data open data and data infrastructures An introduction to thinking conceptually about data data infrastructures data analytics and data markets A critical discussion of the technical shortcomings and the social political and ethical consequences of the data revolution An analysis of the implications of the data revolution to academic business and government practices

Geographies, Mobilities, and Rhythms over the Life-Course Elaine Stratford, 2014-11-20 By thinking in terms of the geographies of mobilities we are better able to understand the central importance of movements rhythms and shifting emplacements over the life course This innovative book represents research from a new and flourishing multidisciplinary field that includes among other things studies on smart cities infrastructures and networks mobile technologies for automated highways or locative media mobility justice and rights to stay or enter or reside These activities cadences and changing attachments to place have profound effects first upon how we conduct or govern ourselves and each other via many social institutions and second upon how we constitute the spaces in and through which our lives are experienced This scholarship also has clear connections to numerous aspects of social and spatial policy and planning

Informal Sector Innovations Mammo Muchie, Saradindu Bhaduri, Angathevar Baskaran, Fayaz Sheikh, 2017-10-02 It is well documented that the space of informal economic activity is rising across the globe This rise has been particularly significant in the least developed and developing countries especially after the onset of neo liberal policies and withdrawal of welfare state There has also been a shift in

academic thinking on informal sector with attempts being made to understand the contribution of informal sector in generating employment and economic growth rather than focusing solely on exploitative labour conditions in these economic activities. Indeed, with the retreat of welfare state and the introduction of contract labour in the formal sector, many issues related to occupational hazards and improper labour conditions do not remain unique to the informal sectors of the economy, particularly in less developed countries. This volume addresses a specific concern: the issue of knowledge generation and innovative activities which lies at the core of sustained competitive advantage of these activities. The chapters in this book were originally published in the African Journal of Science, Technology, Innovation and Development. Yojana, 2014

Rare Earth Frontiers Julie M. Klinger, 2018-01-15. *Rare Earth Frontiers* is a work of human geography that serves to demystify the powerful elements that make possible the miniaturization of electronics, green energy and medical technologies and essential telecommunications and defense systems. Julie Michelle Klinger draws attention to the fact that the rare earths we rely on most are as common as copper or lead and this means the implications of their extraction are global. Klinger excavates the rich historical origins and ongoing ramifications of the quest to mine rare earths in ever more impossible places. Klinger writes about the devastating damage to lives and the environment caused by the exploitation of rare earths. She demonstrates in human terms how scarcity myths have been conscripted into diverse geopolitical campaigns that use rare earth mining as a pretext to capture spaces that have historically fallen beyond the grasp of centralized power. These include legally and logistically forbidding locations in the Amazon, Greenland and Afghanistan and on the Moon. Drawing on ethnographic archival and interview data gathered in local languages and offering possible solutions to the problems it documents, this book examines the production of the rare earth frontier as a place, a concept and a zone of contestation, sacrifice and transformation.

Human Rights Issues in Tourism Atsuko Hashimoto, Elif Harkonen, Edward Nkyi, 2020-12-28. This book uniquely focuses on human rights issues associated with tourism development and tourism businesses. Tourism is a manifestation of globalization and it intersects with human rights on so many levels. These implications are increasingly relevant in light of the COVID-19 pandemic and subsequent global economic hardship. Split into two main sections, the first establishes a background to human rights issues with reference to tourism and the second provides a multi-disciplinary analysis of a range of selected human rights issues in tourism. These include displacement, security, privacy, discrimination, freedom of movement, the rights of Indigenous people, sex tourism and labour conditions. All chapters include case studies to showcase specific issues such as legal rulings or tourism policies/regulations. This book is written by a highly regarded team of authors specializing in tourism studies and human rights law. This significant volume on the interaction between tourism development and the safeguarding of human rights will be of interest to a variety of disciplines in the fields of tourism, political science and human rights.

The Permanence of Temporary Urbanism Mara Ferreri, 2025-10-01. Temporary urbanism has become a distinctive feature of urban life after the 2008 global financial

crisis This book offers a critical exploration of its emergence and establishment as a seductive discourse and as an entangled field of practice encompassing architecture visual and performative arts urban regeneration policies and planning Drawing on seven years of semi ethnographic research it explores the politics of temporariness from a situated analysis of neighbourhood transformation media representations and wider political and cultural shifts in austerity London Through a longitudinal engagement with projects and practitioners the book tests the power of aesthetic and cultural interventions and highlights tensions between the promise of vacant space re appropriation and its commodification Against the normalisation of ephemerality it presents a critique of the permanence of temporary urbanism as a glamorisation of the anticipatory politics of precarity which are transforming cities subjectivities and imaginaries of urban action *Industrial Development Report 2013* United Nations,2014-03-15 This Report demonstrates that a more sustainable energy future is within our reach and that industrial energy efficiency is key It shows how industrial energy efficiency can make a difference by providing a detailed comprehensive global assessment of potentials technologies economic benefits as well as cost and barriers to be removed It provides an overview of the policy instruments most useful for developing economies This innovative work also reminds us that we must act now if we are to unlock the potential of current and emerging energy efficiency technologies The opportunities are significant by reducing energy inputs per unit of output we will benefit from improvements in standards of living while protecting the environment **Global Assessment Report on Disaster Risk Reduction 2013** United Nations,2013 This publication is the third biennial report coordinated by the United Nations Office for Disaster Risk Reduction UNISDR The first and second reports focused primarily on public policy and the role of national and local governments in disaster risk reduction This current report explores why increasing disaster risks represent a growing problem for the economic and business community at different scales It examines how paradoxically business investments that aimed to strengthen competitiveness and productivity may have inadvertently contributed to increasing risks This report seeks to engage businesses in a dialogue on disaster risk management that goes beyond the current emphasis on response and preparedness and instead identifies opportunities for the creation of shared value for business and society *Inevitable Desires* Vincent De Paul,2019 *Judy, Or the London Serio-comic Journal* ,1872 Sessional Papers Great Britain. Parliament. House of Commons,1908 Commonwealth Of Australia Gazette Australia,1913 *OECD Territorial Reviews* ,2013 Encompassing 39 municipalities in two states Puebla Tlaxcala is the fourth largest metropolitan zone in Mexico Over the past five decades the region has successfully attracted major national and international firms building its reputation as both a manufacturing hub specialising in auto production and one of Mexico s most important centres of higher education Yet it also faces important challenges Compared to other large Mexican metropolitan zones Puebla Tlaxcala has a disproportionate share of individuals with low skills which could represent a bottleneck to future growth Urban sprawl is another challenge with important economic environmental and social consequences Puebla Tlaxcala s urban footprint

expanded nearly eight times faster than its population over the past three decades contributing to inadequate service provision and high levels of social marginalisation particularly in the metropolitan periphery To ensure that the region remains competitive and grows sustainably over the long term this review recommends i improving workforce and economic development outcomes particularly by raising the level of low skilled workers ii guiding urban growth more effectively to tackle urban sprawl and improve service delivery iii and addressing governance challenges by building capacity in the public sector and transitioning to forms of metropolitan governance *Special Papers* ,1934 Universities Handbook ,2014
