Geometry And Light The Science Of Invisibility Thomas Philbin:

Geometry and Light Ulf Leonhardt, 2010 The science of invisibility combines two of physics greatest concepts Einstein's general relativity and Maxwell's principles of electromagnetism Recent years have witnessed major breakthroughs in the area and the authors of this volume Ulf Leonhardt and Thomas Philbin of Scotland's University of St Andrews have been active in the transformation of invisibility from fiction into science Their work on designing invisibility devices is based on modern metamaterials inspired by Fermat's principle analogies between mechanics and optics and the geometry of curved space Suitable for graduate students and advanced undergraduates of engineering physics or mathematics and scientific researchers of all types this is the first authoritative textbook on invisibility and the science behind it The book is two books in one it introduces the mathematical foundations differential geometry for physicists and engineers and it shows how concepts from general relativity become practically useful in electrical and optical engineering not only for invisibility but also for perfect imaging and other fascinating topics More than one hundred full color illustrations and exercises with solutions complement the text

The Physics of Invisibility Martin Beech, 2011-10-27 The ability to see is fundamental to our very existence How true our perceptions really are depends upon many factors and not least is our understanding of what light is and how it interacts with matter It was said that the camera the icon of light recording instruments never lies and in the day of the glass plate and celluloid roll film this might well have been true But in this modern era with electronic cameras and computer software it is often safe to assume that the camera always lies The advertising images that bombard our every waking moment are manipulated in shape profile color and form In this new era

light can be manipulated with metamaterials to make one object look like another or even cause that objects to vanish literally before our eyes not only can the image we see be manipulated but so can the light itself **Light Visible and Invisible** Silv.
