*Evolution Education Around the Globe* Hasan Deniz, Lisa A. Borgerding, 2018-06-21 This edited book provides a global view on evolution education. It describes the state of evolution education in different countries that are representative of geographical regions around the globe such as Eastern Europe, Western Europe, North Africa, South Africa, North America, South America, Middle East, Far East, South East Asia, Australia, and New Zealand. Studies in evolution education literature can be divided into three main categories: a) understanding the interrelationships among cognitive, affective, epistemological, and religious factors that are related to people's views about evolution; b) designing/implementing/evaluating evolution education curriculum that reflects contemporary evolution understanding; and c) reducing antievolutionary attitudes. This volume systematically summarizes the evolution education literature across these three categories for each country or geographical region. The individual chapters thus include common elements that facilitate a cross-cultural meta-analysis. Written for a primarily academic audience, this book provides a much-needed common background for future evolution education research across the globe.

*Teaching and Learning for Change* Ingrid Schudel, Zintle Songqwaru, Sirkka Tshiningayamwe, Heila Lotz-Sisitka, 2021 Like many national curricula around the world, South Africa's curriculum is rich in environment and sustainability content. Despite this, environmental teaching and learning can be challenging for educators. This comes at a time when Sustainable Development Goal 4 via Target 4.7 requires governments to integrate Education for Sustainable Development into national education systems. *Teaching and Learning for Change* is an exploration of how teachers and teacher educators engage environment and sustainability content, knowledge, methods, and assessment practices; an exposition of quality education processes in support of ecological and social justice and sustainability. The chapters evolve from a ten-year research programme led out of the DSI/NRF SARChI Chair in Global Change and Social Learning Systems, working with national partners in the Fundisa for Change programme and the UNESCO Sustainability Starts with Teachers programme. They show the integration of education for sustainable development in teacher professional development and curricula in schools in South Africa. They reveal how university-based researchers, teachers, and teacher educators have made theoretically and contextually reasoned choices about their lives and their teaching in response to calls for a more sustainable world in which education must play a role. *Teaching and Learning for Change* will be of interest to education policymakers in government, advisors, and educators in educational and environmental departments, NGOs, and other institutions. It will also be of interest to teacher educators, teachers, and researchers in education more generally and environment and sustainability education specifically.
