ECKM2014-Proceedings of the 15th European conference on Knowledge Management Carla Vivas,2014-10-01 The world economy in which we are living poses challenges that lead to a realization that more of the same will be difficult to sustain This provides an illustration that in order to create new or modified knowledge practices strengthen customer relationships and thus positively influence customer satisfaction organizations must be flexible in configuring combining knowledge and knowledge structures in a way that is appropriate for delivering value to the customer It must simultaneously develop effective strategies for updating the knowledge of its staff members necessary for underpinning the creation and delivery of appropriate knowledge services Thus unlearning forgetting becomes a critical means for organizational success The ECKM community of scholars has already initiated dialogue that links its particular strengths to innovation issues This conference aims to further that dialogue by attracting leading edge work that leverages the ECKM community s in depth understanding of learning and unlearning to better understand knowledge management Our aim is to stimulate breakthrough research streams linking learning unlearning and knowledge management How can organizations tailor use and extend techniques and tools from knowledge management for improving their business practices and processes Building upon existing work on knowledge management KM and organizational learning the conference will promote interdisciplinary approaches from computer science and information systems business management and organization science as well as cognitive science Emphasis will be put on systematic learning from experience KM tools and KM success factors A special interest belongs to knowledge management initiatives which are lightweight i e do not place considerable additional burden on users and KM experts allow an incremental adoption i e do not require large up front investment before any return of investment is at least visible and are flexible regarding frequent changes in experts and topics Continuing the success of the ECKM conference series since 2000 the 2015 conference will provide an international communication forum bringing together academia and industry for discussing the progress made and addressing the challenges faced by continuous learning in knowledge intensive organizations

**Second International Handbook of Urban Education** William T. Pink,George W. Noblit,2017-01-06 This second handbook offers all new content in which readers will find a thoughtful and measured interrogation of significant contemporary thinking and practice in urban education Each chapter reflects contemporary cutting edge issues in urban education as defined by their local context One important theme that runs throughout this handbook is how urban is defined and under what conditions the marginalized are served by the schools they attend Schooling continues to hold a special place both as a means to achieve social mobility and as a mechanism for supporting the economy of nations This second handbook focuses on factors such as social stratification segmentation segregation racialization urbanization class formation and maintenance and patriarchy The central concern is to explore how equity plays out for those traditionally marginalized in urban schools in different locations around the globe Researchers will find an

analysis framework that will make the current practice and outcomes of urban education and their alternatives more transparent and in turn this will lead to solutions that can help improve the life options for students historically underserved by urban schools

*BK Channels: Integrators of Cellular Signals in Health and Disease* Thomas M. Weiger,Alex Dopico,Anton Hermann,2017-11-10 Maxi calcium activated potassium channels BK are an amazing category of ion channels which are found in cellular plasma membranes as well as in membranes of intracellular organelles The function of these channels is to repolarize any excited membrane by passing a potassium outward current in response to depolarization and or increase in local calcium levels Thus voltage and calcium ions are involved in gating the channel under physiological conditions This dual activation makes them perfect sensors for many cellular events that require integration between intracellular calcium levels and electrical signals A plethora of physiological and pathophysiological functions such as membrane hyperpolarization modulation of synaptic transmission hormone secretion or mental deficiencies vaso regulation epilepsies heart diseases myotonic dystrophies hypertension etc in almost all cells and tissues were reported for these channels BK channels are main targets for important ligands like alcohol and gaseous neurotransmitters such as NO CO or H<sub>2</sub>S to name a few In the last years the molecular entities and mechanisms involved in modulation of BK channels have gained tremendous attention as the key role of these channels in cellular processes became increasingly recognized Indeed accessory proteins such as slob beta and gamma subunits all serve to modulate the channel gating characteristics Moreover channel subunit expression and function is further tuned by phosphorylation dephosphorylation processes redox mechanisms and the lipid microenvironment of the BK channel protein complex This e book contains structural and functional aspects of BK channels channel modulation by a variety of agents and cellular components as well as the channel s relevance in health and disease

*The Political Economy of Dissent* Peter Blunt,Cecilia Escobar,Vlassis Missos,2025-10-22 In 2020 Noam Chomsky asserted that the time to panic about the existential threats posed by nuclear war global warming and the stifling of informed debate in

supposedly open and democratic societies was upon us and that it was the duty of concerned citizens to act accordingly. Hastened by the lingering aftermath of the 2008 financial crisis, the COVID-19 pandemic, the proxy war in Ukraine, the decline of US economic hegemony and increasing hostility between the US and China, he concluded in early 2023 that unless the US could be persuaded to cooperate with its declared adversaries and capitalism could be overthrown or defanged, there was little hope for survival. The authors of this book argue that achieving these ends will depend greatly on effective individual and collective worldwide dissent. The book analyses and exemplifies dissent in the main domains of institutionalised capitalist control and the manufacture of uninformed consent: namely political economy, education, the media, IT, work, and trade unions, the commons and communities, and culture. And thereby gives voice and hope to the downtrodden and marginalised, including indigenous peoples and those of the global south. It provides an uplifting counter to the otherwise seemingly overwhelming expression of uninformed consent, one that will inspire by example and be an antidote to the fear and defeatism instilled by capitalist intransigence, indoctrination, and control. The book is addressed to students, scholars, and researchers primarily, but its breadth of coverage, authenticity, and plain writing style will appeal to activists, community organisers, and concerned citizens both in industrialised countries and the global south.
