Written by a team of expert contributors that specialise in teaching every age of learner from primary school through to adult, the book shows that everyone can progress in mathematics if they have Mathematical Resilience and sets out practical strategies to support learners in developing this important attribute. Chapters cover: How to measure mathematics anxiety and resilience; Tools for building mathematical resilience; Building a resilient mathematical learning environment; The power of coaching; Working with groups, individuals, and support staff; Supporting parents and carers. The world faces huge challenges that involve mathematical thinking, including climate change and economic injustice.
