*Today's World* Michael J. Nakkula, Andrew J. Schneider-Muñoz, 2018-11-02 This groundbreaking three volume set spotlights how conditions around the world are affecting the healthy development of adolescents in their respective environments on all six continents. Continually unstable or perpetually poor economic conditions, globalization and rapid technological change are just three of the forces affecting a group of 1.2 billion strong today, a demographic poised to become our world leaders and catalysts in the not too distant future. The world's adolescents, led by two editors who have been dedicated to studying adolescent development worldwide for decades, this novel collection of works from contributors in more than 40 countries emphasizes how possibilities for healthy mental and physical development are affected by the difficulties youths face in their countries and how these challenges have shaped and are shaping contemporary teenage life today. The set comprehensively addresses issues for adolescents across the globe such as the day to day challenges of poverty, inadequate education, violence or war, disease, reproductive matters, globalization and technological challenges and more, while also providing a strengths based focus in the volumes showing how and why some teenagers in each country have surmounted the challenges and forged stronger characters to better their worlds. These stories document more than personal victories and their experiences matter far more than the adolescents themselves. In its State of the World's Children 2011 report, UNICEF noted that the world community needs to turn its attention to adolescents in need, explaining that focusing on this large and potentially powerful group makes economic sense as well as being a necessary step in working towards achieving human justice. By addressing the risks, challenges and strengths of teenagers as a group in countries worldwide, this work serves to break the cycle of poverty, violence, discrimination and death for adolescents.

**Issues in Distance Education** Maureen Snow Andrade, 2016-03-02 In this environment of disruptive technological change, higher education institutions must determine whether they will develop and offer technology supported hybrid or online courses and degrees, which courses and degrees, how many, for whom and for what purpose. They must make decisions about development models and design processes, costs and student and faculty support. In this volume, the authors explore the current and future practice of distance education in higher education institutions, including developing an initial infrastructure to support course design and development, revitalizing existing structures and processes for distance education and cutting edge practices that innovate and lead the field. These topics help guide decision makers as they determine appropriate responses to distance learning opportunities. This is the 173rd volume of the Jossey-Bass quarterly report series, *New Directions for Higher Education*, addressed to presidents, vice presidents, deans and other higher education decision makers on all kinds of campuses. It provides timely information and authoritative advice about major issues and administrative problems confronting every institution.
