## **Grade Maths Papermemo November 2012:**

**The Arab Spring Five Years Later** Hafez Ghanem,2016-03-01 The dilemma felt by Arab youth was captured in Tunisia by the selfimmolation in 2010 of Mohamed Bouazizi who was frustrated by restrictions on his small street vending business His death became the catalyst for revolts throughout the Middle East The frustration had been building for some time large segments of society were denied economic progress while the middle class was squeezed and governments had cut back on services and public employment Since the series of uprisings began the debate in Arab countries has focused almost exclusively on politics and questions of national identity However economic issues are driving the agenda and real economic grievances must be addressed in order for the many transitions to succeed Hafez Ghanem gives a thorough assessment of the Arab Spring beginning with political developments since the revolutions and changes in the legal and institutional frameworks that affect economies Arab economies grew at healthy rates before the revolts but the benefits of economic growth were unfairly distributed The politically connected reaped great benefits while educated youth could not find decent jobs and the poor and middle class struggled to make ends meet Ghanem advises that Arab countries need to adopt new economic policies and programs that enhance inclusiveness expand the middle class and foster growth in undeveloped regions Key elements include strengthening economic institutions developing small businesses reforming the education system to better prepare Arab youth for the modern labor market promoting gender equality with the objective of raising female labor market participation rates and setting up programs for rural and regional development to reduce inequality and eliminate extreme poverty

*Ethics in the University* James G. Speight,2016-08-26 It is the continuous reports of unethical behavior in the form of data manipulation cheating plagiarism and other forms of unacceptable behavior that draw attention to the issues of misconduct The causes of misconduct are manifold whether it is the need to advance in a chosen discipline or to compete successfully for and obtain research funding Disappointingly individuals who are oriented to any form of dishonesty are individuals who had previously displayed little or no consideration for the feelings of others and are therefore more interested in themselves at the expense of the students and others recognizing them by any means necessary This ground breaking and honest examination of ethics in the university setting is unabashed in its descriptions of misconduct in the academic world The text is well furnished with numerous citations that point to academic misconduct and the final chapter deals with the means by which misconduct can be mitigated a strong reminder to everyone in the academic community that above board conduct must be part of our overall message of learning and part of the whole point of education in the first place A must have for academics and non academics alike this text is the second in a series of books on ethics by James G Speight and it is useful to anyone in any industry who is interested in ethical behavior and how to navigate the sometimes murky depths of our professional lives

Agencies,2017      Knowledge, Curriculum and Equity Brian Barrett,Ursula Hoadley,John Morgan,2017-07-20 In 2008 the first in a series of symposia established a social realist case for knowledge as an alternative to the relativist tendencies of the constructivist post structuralist and postmodernist approaches dominant in the sociology of education The second symposium focused on curriculum and the development of a theoretical language grounded in social realism to talk about issues of knowledge and curriculum Finally the third symposium brought together researchers in a broad range of contexts to build on these ideas and arguments and with a concerted empirical focus bring these social realist ideas and arguments into conversation with data Knowledge Curriculum and Equity Social Realist Perspectives contains the work of the third symposium where the strengths and gaps in the social realist approach are identified and where there is critical recognition of the need to incrementally extend the theories through empirical study Fundamentally the problem that social realism is seeking to address is about understanding the social conditions of knowledge production and exchange as well as its structuring in the curriculum and in pedagogy The central concern is with the on going social reproduction of inequality through schooling and exploring whether and how foregrounding specialised knowledge and its access holds the possibility for interrupting it This book consists of 13 chapters by different authors working in Oceania Asia Europe Africa and North America From very different vantage points the authors focus their theoretical and empirical sights on the assumptions about knowledge that underpin educational processes and the pursuit of more equitable schooling for all      *Who's who Among Students in American Universities and Colleges* Henry Pettus Randall,1973      Forthcoming Books Rose Arny,1989
