General Paper 80 november 2012:

Minerals Yearbook ,2013 *Minerals Yearbook - Area Reports: International Review* Interior Department, Geological Survey,2013-12-09 The Minerals Yearbook is an annual publication that reviews the mineral and material industries of the United States and foreign countries The Yearbook contains statistical data on materials and minerals and includes information on economic and technical trends and development The Minerals Yearbook includes chapters on approximately 90 commodities and over 175 countries This volume of the Minerals Yearbook provides an annual review of mineral production and trade and of mineral related government and industry developments in more than 175 foreign countries Each report includes sections on government policies and programs environmental issues trade and production data industry structure and ownership commodity sector developments infrastructure and a summary outlook [Economywide Impact of Maize Export Bans on Agricultural Growth and Household Welfare in Tanzania](#) Xinshen Diao,Adam Kennedy,Athur Mabiso,Angga Pradesha,2013-09-03 In recent years the government of Tanzania like other governments in Africa south of the Sahara has periodically banned the export of staple crops maize in an attempt to ensure the domestic food supply and protect its citizens from international food price hikes While this policy seems to be a common response to domestic production shortfalls or to high prices in international or neighboring countries markets export bans not only have the potential to reduce producer prices locally but also because the bans are often ad hoc can cause significant market uncertainty for farmers and the private sector ultimately making them less responsive in both supply and trade opportunities in the future While complaints by farmers and traders regarding the export bans frequently appear in the newspapers in Tanzania few rigorous analyses have been done to quantitatively measure the impacts of the policy Given this knowledge gap and policy demand we study the impact of export bans in Tanzania using a computable general equilibrium model We find that although maize is an important food crop in Tanzania its contribution to food price inflation is rather limited and that banning cross border maize exports lowers the national food price index by only 0.624 percent compared with the free export scenario The benefits of lower prices are captured primarily by urban households but maize producer prices decrease by 7.26 percent depending on the region We also find that the export ban decreases the wage rate for low skilled labor and the returns to land while returns to nonagricultural capital and wage rate for the skilled labor increase further hurting poor rural households and thus increasing poverty for the country as a whole **Global Productivity** Alistair Dieppe,2021-06-09 The COVID 19 pandemic struck the global economy after a decade that featured a broad based slowdown in productivity growth Global Productivity Trends Drivers and Policies presents the first comprehensive analysis of the evolution and drivers of productivity growth examines the effects of COVID 19 on productivity and discusses a wide range of policies needed to rekindle productivity growth The book also provides a far reaching data set of multiple measures of productivity for up to 164 advanced economies and emerging market and developing economies and it introduces a new sectoral database of

productivity The World Bank has created an extraordinary book on productivity covering a large group of countries and using a wide variety of data sources There is an emphasis on emerging and developing economies whereas the prior literature has concentrated on developed economies The book seeks to understand growth patterns and quantify the role of among other things the reallocation of factors technological change and the impact of natural disasters including the COVID 19 pandemic This book is must reading for specialists in emerging economies but also provides deep insights for anyone interested in economic growth and productivity Martin Neil Baily Senior Fellow The Brookings Institution Former Chair U S President s Council of Economic Advisers This is an important book at a critical time As the book notes global productivity growth had already been slowing prior to the COVID 19 pandemic and collapses with the pandemic If we want an effective recovery we have to understand what was driving these long run trends The book presents a novel global approach to examining the levels growth rates and drivers of productivity growth For anyone wanting to understand or influence productivity growth this is an essential read Nicholas Bloom William D Eberle Professor of Economics Stanford University The COVID 19 pandemic hit a global economy that was already struggling with an adverse pre existing condition slow productivity growth This extraordinarily valuable and timely book brings considerable new evidence that shows the broad based long standing nature of the slowdown It is comprehensive with an exceptional focus on emerging market and developing economies Importantly it shows how severe disasters of which COVID 19 is just the latest typically harm productivity There are no silver bullets but the book suggests sensible strategies to improve growth prospects John Fernald Schrodgers Chaired Professor of European Competitiveness and Reform and Professor of Economics INSEAD
